Recipes for vegan athletes Protein recipes for training, performance and recovery ,2024-04-01 A vegan diet is one that excludes all animal products including meat fish poultry dairy products eggs and honey Most vegans also avoid wearing animal derived materials such as fur leather silk and wool and using household products and cosmetics containing animal derived ingredients The Vegan Society defines veganism as a way of living which seeks to exclude as far as is possible and practicable all forms of exploitation of and cruelty to animals for food clothing or any other purpose You may have heard the term plant based which is sometimes used interchangeably with vegan but sometimes with a vegetarian pescatarian includes fish or flexitarian diet that still includes small amounts of animal products In fact there is no universally agreed definition of the term which in my view renders it rather meaningless So I have used the term vegan throughout this book

Nutritional Coaching Strategy to Modulate Training Efficiency K.D., Tipton,L.J.C., van Loon,2013-04-15 Regular training and adequate nutrition are key factors in modulating exercise performance Optimal performance requires a healthy diet adapted to the specific demands of the individual athlete s training and competition Research has shown an impact of dietary intervention on the modulation of the skeletal muscle adaptive response to prolonged exercise training Proper nutritional coaching should therefore not be restricted to the competitive events but needs to be applied throughout both training and competition each with its specific requirements regarding nutrient provision Proper nutritional counseling will thus improve exercise training efficiency and ultimately increase performance capacity Moreover dietary counseling to modulate training efficiency is also relevant to the general public and the more frail clinically compromised patient groups This book provides a solid scientific basis to help the reader define key targets for future interventions and develop new insights into the complex interaction between nutrition and exercise
