You Should Quit Reddit Jacob Desforges, 2023-02-21 In recent years countless books articles and documentaries have addressed the negative effects that social media platforms have wrought on their users and society However these former works are incomplete nearly no attention has been paid to Reddit one of the most popular websites in the world Reddit is certainly unique among social platforms but its potential for addiction and darker side of nefarious activity should absolutely not be understated Additionally nearly no actionable advice has been provided to users of these platforms The audience is told that these websites and apps are harming their mental health wasting their time and that they are addictive which would logically make the task of quitting rather difficult but then provided zero guidance on how to disconnect from them Over 200 000 users gather on Reddit's r/NoSurf community to discuss reducing their internet use the forum is filled with reports of people who want to quit Reddit but find themselves psychologically compelled to return to the site over and over For moderate to heavy users of these platforms quitting is clearly not so simple **You Should Quit Reddit** is a paradigm shift in the genre Jacob Desforges was a Reddit user of over a decade and a self admitted Reddit addict who spent on average around three hours daily on the site Not only is this the first book investigating Reddit's flaws as a platform but it is also written from the perspective of someone who experienced firsthand the struggle that comes with quitting these addictive platforms This book therefore also provides readers with the practical advice tools and techniques needed to shatter the cycle of digital addiction enabling them to quit visiting Reddit and other time wasting websites for good so they can effectively reclaim their time to use in a more intentional manner

The Politics of Social Media Manipulation Richard Rogers, Sabine Niederer, 2025-10-01 Disinformation and so-called fake news are contemporary phenomena with rich histories. Disinformation or the willful introduction of false information for the purposes of causing harm recalls infamous foreign interference operations in national media systems. Outcries over fake news or dubious stories with the trappings of news have coincided with the introduction of new media technologies that disrupt the publication, distribution, and consumption of news from the so-called rumour-mongering broadsheets centuries ago to the blogosphere recently. Designating a news organization as fake or *der Lügengruppe* has a darker history associated with authoritarian regimes or

populist bombast diminishing the reputation of elite media and the value of inconvenient truths In a series of empirical studies using digital methods and data journalism the authors inquire into the extent to which social media have enabled the penetration of foreign disinformation operations the widespread publication and spread of dubious content as well as extreme commentators with considerable followings attacking mainstream media as fake
