Facebook Nation Newton Lee, 2014-10-16 Facebook's psychological experiments and Edward Snowden's NSA leaks epitomize a world of increasing information awareness in the social media ecosystem. With over a billion monthly active users, Facebook as a nation is overtaking China as the largest country in the world. President Barack Obama in his 2011 State of the Union Address called America the nation of Edison and the Wright brothers and of Google and Facebook. U.S. Chief Information Officer Steven VanRoekel opines that America has become a Facebook nation that demands increased transparency and interactivity from the federal government. Ubiquitous social networks such as Facebook, Google, Twitter, and YouTube are creating the technologies, infrastructures, and big data necessary for Total Information Awareness, a controversial surveillance program proposed by DARPA after the 9/11 attacks. NSA's secret PRISM program has reinvigorated WikiLeaks founder Julian Assange's accusation that Facebook is the most appalling spying machine that has ever been invented. Facebook CEO Mark Zuckerberg once said, "We exist at the intersection of technology and social issues." This book offers discourse and practical advice on the privacy issue in the age of big data, business intelligence in social media, e-government, and e-activism, as well as personal total information awareness. This expanded edition also includes insights from Wikipedian Emily Temple Wood and Facebook ROI experts Dennis Yu and Alex Houg. [Streaming Sounds](#)

Michael James Walsh, 2024-03-29 In a time when music streaming has become the dominant mode of consuming music recordings, this book interrogates how users go about listening to music in their everyday lives in a context where streaming services are focused on not only the circulation of music for users but also the circulation of user data and attention. Drawing insights directly from interviews with users, music streaming is explained as never merely a neutral technology but rather one that seeks to actively shape user engagement. Users respond to streaming platforms with some relishing these aspects that provide music to be drawn into daily activities while others show signs of resistance. It is this tension that this book explores. This unique and accessible study will be ideal reading for both scholars and students of popular music studies, communication studies, sociology, media, and cultural studies.

Sonny Long,2012-03-27 Among Murderers and Madness is a nearly 20 year journey a winding road from the murder of a mother and her two children to the guilty plea of a man Kevin Hailey who many believed from the beginning had committed the crimes Along the way a cast of characters emerge some good some bad some even bizarre The role of the media covering the case is also examined not only the author s own publication but the other local newspaper area newspapers and television stations as well as the national media including Gentleman s Quarterly the Maury Povich Show Inside Edition and A Current Affair Journalist Sonny Long followed the case since the day the bodies were found He established a close relationship with the victims family and friends befriended members of law enforcement and remained in correspondence with Hailey s mother even after she was convicted of murdering her husband He has also corresponded with Hailey with the convicted murderer proclaiming his innocence despite the plea agreement The author s intimate conversations with those closest to the case and his tenacity in keeping the case alive in the minds of the public makes Among Murderers and Madness the definitive source for not only the senseless stealing of three lives but for the maelstrom the murders caused in both the lives of two families and in the consciousness of a community *Living with Algorithms*

Ignacio Siles,2023-04-25 A nuanced account from a user perspective of what it s like to live in a datafied world We live in a media saturated society that increasingly transforms our experiences relations and identities into data others can analyze and monetize Algorithms are key to this process surveilling our most mundane practices and to many their control over our lives seems absolute In Living with Algorithms Ignacio Siles critically challenges this view by surveying user dynamics in the global south across three algorithmic platforms Netflix Spotify and TikTok and finds surprisingly a more balanced relationship Drawing on a wealth of empirical evidence that privileges the user over the corporate Siles examines the personal relationships that have formed between users and algorithms as Latin Americans have integrated these systems into the structures of everyday life enacted them ritually participated in public with and through them and thwarted them Sometimes users follow algorithms Siles finds and sometimes users resist them At times users do both Agency lies in the navigation of the spaces in between By analyzing what we do with algorithms rather than what algorithms do to us Living with Algorithms clarifies the debate over the future of datafication and whether we have a say in its development Concentrating on an understudied region of the global south the book provides a new perspective on the commonalities and differences among users within a global ecology of technologies *Teaching Music Improvisation with Technology*
