Emerging Secure Networks, Blockchains and Smart Contract Technologies Jong-Moon Chung, 2024-09-16 This book equips readers with the essential knowledge to innovate and improve network performance while ensuring security and safety. It covers foundational TCP/IP Internet network technologies and significant cyber attack case studies. Additionally, it explains the core technologies behind Bitcoin, Ethereum, blockchains, smart contracts, hash functions, and encryption. The book also explores advanced concepts such as reinforcement learning, generative AI, federated learning, and digital twin technologies, offering new approaches to enhancing network security and blockchains through these cutting-edge methods.

Software Defined Internet of Everything Gagangeet Singh Aujla, Sahil Garg, Kuljeet Kaur, Biplab Sikdar, 2022-01-13 This book provides comprehensive discussion on key topics related to the usage and deployment of software-defined networks (SDN) in Internet of Everything applications like healthcare systems, data centers, edge fog computing, vehicular networks, intelligent transportation systems, smart grids, smart cities, and more. The authors provide diverse solutions to overcome challenges of conventional network binding in various Internet of Everything applications where there is need of an adaptive, agile, and flexible network backbone. The book showcases different deployment models, algorithms, and implementations related to the usage of SDN in Internet of Everything applications along with the pros and cons of the same. Even more, this book provides deep insights into the architecture of software-defined networking, specifically about the layered architecture and different network planes, logical interfaces, and programmable operations. The need of network virtualization and the deployment models for network function virtualization is also included with an aim towards the design of interoperable network architectures by researchers in future. Uniquely, the authors find hands-on practical implementation, deployment scenarios, and use cases for various software-defined networking architectures in Internet of Everything.
