Power marketing administrations their ratesetting practices compared with those of nonfederal utilities : report to the Chairman, Subcommittee on Water and Power, Committee on Resources, House of Representatives. , *Federal Job Training, a Comparison of Public and Private Sector Performance* United States. General Accounting Office, 1983 **Practices of Comparing** Angelika Epple, Walter Erhart, Johannes Grave, 2020-06-22 Practices of comparing shape how we perceive organize and change the world Supposedly innocent practices of comparing play a decisive role in forming categories boundaries and hierarchies but they can also give an impetus to question and change such structures Like almost no other human practice comparing pervades all social political economic and cultural spheres This volume outlines the program of a new research agenda that places comparative practices at the center of an interdisciplinary exploration Its contributions combine case studies with overarching systematic considerations They show what insights can be gained and which further questions arise when one makes a seemingly trivial practice comparing the subject of in depth research **New Practices of Comparison, Quantification and Expertise in Education** Christina Elde Mølstad, Daniel Pettersson, 2019-03-29 New Practices of Comparison Quantification and Expertise in Education discusses contemporary trends and activities related to comparisons

and quantifications It aims to help scholars to conduct empirically based research on how comparisons and quantifications are instituted in practice at different levels in the educational system The book furthers discussions on policy by looking at the kinds of activities that comparisons and quantifications lead to at an international regional and national level Most of the book s chapters are based on empirical research conducted in different research projects The book thus brings all these projects together and discusses them as activities promoted by the reasoning of comparisons and quantifications New Practices of Comparison Quantification and Expertise in Education will be of great interest to academics researchers and post graduate students in the fields of comparative education curriculum research and policy studies It will also appeal to those in the fields of teacher education including student teachers

Comparison of State Unemployment Compensation Laws United States. Bureau of Employment Security,1965 Reports of Cases at Law South Carolina. Court of Appeals,James Sanders Guignard Richardson,1859 *Comparison of State Unemployment Insurance Laws* ,1972

Reports of Cases at Law Argued and Determined in the Court of Appeals and Court of Errors of South Carolina South Carolina. Court of Appeals,J. S. G. Richardson,1859 **Brain Networks for Studying Healthy and Pathological Aging Mechanisms and Intervention Efficacy** Christos Frantzidis,Ana B. Vivas,Panagiotis D. Bamidis,2020-11-18 Previous studies showed that both healthy and pathological aging are associated with changes in brain structure and function of the mature human brain The most prominent anatomical alteration are changes in prefrontal cortex morphology volume loss and reduced white matter integrity and hippocampal atrophy Cognitive decline affects mainly the performance of episodic memory speed of sensory information processing working memory inhibitory function and long term memory It has been also proposed that due to the aforementioned changes the aging brain engages in compensatory brain mechanism such as a broader activation of cortical regions mainly frontal rather than specialized activation Evidence suggests that similar changes occur with pathological aging but to a greater extent In this case information flow is disrupted due to neurodegeneration functional activation of posterior occipito temporal regions is decreased and as a consequence the brain fails to process sensorial input in the ventral pathway and cognitive deficits appear In the last years functional alterations associated with aging have been studied using the mathematical notion of graph theory that offers an integrative approach since it examines different properties of the brain network 1 Organization level 2 amount of local information processing 3 information flow 4 cortical community structure and 5 identification of functional anatomical hubs So graph theory offers an attractive way to model brain networks organization and to quantify their pathological deviations Previous studies have already employed this mathematical notion and demonstrated that age related neurodegeneration is often accompanied by loss of optimal network organization either due to diminished local information processing or due to progressive isolation of distant brain regions They have also found that changes in network properties may be present even in the preclinical phase which could be taken as a biological marker of disease
