AI for Nonprofits Darian Rodriguez Heyman, Cheryl Contee, 2025-07-29 A collection of actionable AI tools you can apply immediately to help your nonprofit drive social impact and change In AI for Nonprofits Putting Artificial Intelligence to Work for Your Cause a team of leading nonprofit experts and social entrepreneurs delivers a startlingly insightful strategic how to guide for nonprofit and foundation leaders board

members and volunteers as well as higher education professionals and social entrepreneurs looking to deploy and integrate artificial intelligence tailored to their organization's mission and needs. It's the leading reference guide for people who are entirely new to AI as well as tech-savvy veterans with a deep understanding of artificial intelligence looking for proven hands-on techniques they can apply immediately to transform their nonprofits. Each chapter is based on interviews conducted with 57 of the nonprofit industry's most innovative and reputed voices. Together they provide the latest strategies and tactics for nonprofit generative AI and predictive analytics applications, skills and competencies needed to effectively use this new technology, tips, tools, best practices, resource reviews, and the most common pitfalls to avoid. AI for Nonprofits walks you through exactly how to strategically customize artificial intelligence to improve your fundraising and resource development efforts, marketing and community engagement, program delivery, and back office operations. From human resources management to program strategy, social listening, and donor research, the book provides the on-the-ground techniques you need to deploy to transform your nonprofit's operations. Inside the book, step-by-step frameworks and actionable roadmaps to help you implement AI for content creation, donor engagement, and developing personalized messages at scale. How to protect your donors' privacy and data with policies and practices that comply with rapidly shifting legal and regulatory landscapes. Cutting-edge research and practical case studies drawn from real-world situations that illustrate concrete AI applications. Access to 100 tools, platforms, and providers focused on helping nonprofits optimize their use of AI. AI for Nonprofits explains how to supercharge your organization's fundraising pipeline, marketing, and community engagement, program delivery, back office operations, and governance policies. It's perfect for nonprofit executives, managers, professionals, and leaders. AI for Nonprofits will also earn a place in the libraries of anyone with an interest in using AI to power social impact and change.

AI LAW MODEL FOR ETHICAL LEGISLATION: STRATEGIC RECOMMENDATIONS FOR THE REGULATION OF ARTIFICIAL INTELLIGENCE Oleksii Kostenko, 2025-10-20. This study, the AI Law Model for Ethical Law Strategic Recommendations for the Regulation of Artificial Intelligence, was created as a conscious and purposeful scientific paradigm for systemic flaws and hidden vulnerabilities identified in existing and draft regulations of the USA, EU, PRC, and other leading jurisdictions in the field of artificial intelligence. A comprehensive analysis of international practice shows that even the most ambitious and technologically advanced AI acts leave significant gaps from vague and contradictory definitions of basic concepts, insufficiently elaborated and fragmented ethical requirements, to the complete absence or insufficiency of a deep assessment of the socio-psychological and cultural consequences of AI implementation. Such shortcomings and regulatory gaps can lead to serious legal conflicts, ethical crises, increased social tensions, as well as to the loss or undermining of public trust in digital institutions and public policy in general. The purpose of the project, Model AI Law for Ethical Law Strategic Recommendations for the Regulation of Artificial Intelligence, is not only to warn against mechanical and little critical copying of foreign regulatory models but also to form a thorough approach adapted to the realities of national jurisdictions.

based on deep interdisciplinary expertise and comprehensive risk analysis This approach involves considering the legal technical ethical social cultural and medical aspects of AI implementation which makes it possible to consider LLM technology as a multidimensional phenomenon with long term consequences The key idea is that AI laws cannot be the product of the work of narrow profile initiators who are far from a systematic understanding of the technology or authors specializing exclusively in one field law technology medicine etc without proper involvement of related fields Only a broad association of interdisciplinary lawyers highly qualified technical specialists sociologists psychologists doctors ethicists cybersecurity and risk management specialists as part of integrated research groups provides a real opportunity to cover the entire range of direct and indirect risks as well as to predict the long term social economic and political consequences of the development and use of AI The structure of the study provides not only a formal statement of provisions but also sections that define and disclose in detail the fundamental principles of human centeredness transparency accountability non discrimination and cyber resilience taking into account international standards and scientific approaches At the same time these sections are combined with analytical blocks which systematically describe problem areas identified in other countries provide examples of negative consequences of ignoring these principles and formulate recommendations for avoiding such risks in Ukrainian legislation In particular the following critical aspects are emphasized legal gaps and lack of clearly defined enforcement mechanisms that allow individual actors to avoid or minimize liability for the direct or indirect harmful consequences of the use of AI including economic ethical and social losses the lack of a single scientifically based and normatively fixed risk assessment scale which complicates the objective identification of the level of danger of specific AI solutions and creates opportunities for conscious or unintentional manipulations in the classification of systems in particular in order to avoid regulatory requirements or reduce the scope of verification measures lack of effective transparent and legally enshrined mechanisms of public control and independent audit capable of ensuring systematic monitoring objective assessment and public information about the compliance of AI systems with ethical and legal standards ignoring a deep and comprehensive analysis of the psychological emotional and sociocultural impacts of AI on vulnerable populations including children the elderly people with disabilities and other socially sensitive categories which can lead to deepening inequality social exclusion and negative transformations of cultural values weak integration and insufficient regulatory consolidation of internationally recognized technical standards and protocols into legal regulation which complicates the unification of requirements reduces the compatibility of national solutions with global ecosystems and creates risks of technical and legal fragmentation Thus this draft law is not only a draft law in the traditional sense but also a deeply thought out analytical and regulatory warning designed to become a conceptual guide for future state policy in the field of artificial intelligence Its task is to incorporate a multi level preventive mechanism into AI legislation that would combine preventive adaptive and corrective regulatory tools that can flexibly respond to new technological challenges and ethical dilemmas The

implementation of this approach should guarantee not only a formal balance between legal regulation technological innovation and public security but also ensure the stability of this balance in the context of rapid transformations and global competition avoiding strategic and tactical mistakes already made by world leaders in this area **Federal Register** ,2000

Artificial Intelligence Applications Using ChatGPT in Education: Case Studies and Practices Aslam, Muhammad Shahzad,Nisar, Saima,2023-08-29 In the realm of education the challenge lies in effectively utilizing Artificial Intelligence to transform medical learning Artificial Intelligence Applications Using ChatGPT in Education Case Studies and Practices authored by Muhammad Shahzad Aslam and Saima Nisar offers insights into this issue With expertise in Medical and Health Education and Health Informatics the authors explore AI s potential in reshaping medical education Traditional medical education struggles to keep up with expanding knowledge and evolving medical science leaving educators and students overwhelmed by vast information Ethical concerns such as plagiarism further complicate matters A solution is needed that blends technology with effective teaching Artificial Intelligence Applications Using ChatGPT in Education Case Studies and Practices proposes such a solution By harnessing ChatGPT s capabilities as an AI chatbot the book suggests a self guided learning tool Backed by case studies the authors demonstrate how ChatGPT can become a personalized tutor helping students grasp complex medical concepts at their own pace The book also delves into the ethical aspects of AI integration ensuring responsible use in academia *Fact Forward* Dan Gaylin,2025-04-08 Solutions to increase trust and empower better decision making in a data rich world *Fact Forward The Perils of Bad Information and the Promise of a Data Savvy Society* explores how a growing deluge of data has led to a data rich world with abundant new opportunities and a precipitous decline in trust due to the problems we face in producing communicating and consuming data This book takes readers on a journey through the data ecosystem showing how data producers data consumers and data disseminators all have a role to play in creating a more data savvy society Written by Dan Gaylin president and CEO of NORC at the University of Chicago a leading research organization in the field of social science and data science this book demonstrates the urgent need for greater transparency on the part of data producers increased data literacy on the part of data communicators and data consumers a societal commitment to data education and infrastructure *Fact Forward The Perils of Bad Information and the Promise of a Data Savvy Society* earns a well deserved spot on the bookshelves of leaders across industries and all individuals who want to build a better society and world by improving the way we present analyze and make use of data
