The New Global Universities Bryan Penprase, Noah Pickus, 2023-12-05 Reimagining higher education around the world lessons from the creation of eight new colleges and universities in Africa Asia the Middle East and North America Higher education is perpetually in crisis buffeted by increasing costs and a perceived lack of return on investment campus culture that is criticized for stifling debate on controversial topics and a growing sense that the liberal arts are outmoded and irrelevant Some observers even put higher education on the brink of death The New Global Universities offers a counterargument telling the story of educational leaders who have chosen not to give up on higher education but to reimagine it The book chronicles the development and launch of eight innovative colleges and universities in Africa Asia the Middle East and North America describing the combination of intellectual courage entrepreneurial audacity and adaptive leadership needed to invent educational institutions today The authors both academic leaders who have been involved in launching ventures similar to the ones described offer a unique inside perspective on these efforts Bryan Penprase and Noah Pickus show how the founders of new colleges and universities establish distinctive brands in a sector dominated by centuries old institutions secure creative sources of funding attract stellar faculty and students and design appealing curriculums and campuses all while managing tradeoffs and setbacks balancing local needs and global aspirations and wrestling with challenges to academic freedom These new educational institutions include two universities in Asia and the Middle East built by well established American parent institutions others in Africa and North America that offer holistic reform from the ground up and leverage new technologies to lower costs and still others that adapted the American liberal arts model to Asian and African contexts Their experiences offer lessons for future founders of new universities and for those who want to renew and rejuvenate existing ones *Setting a New Agenda for Student Engagement and Retention in Historically Black Colleges and Universities* Prince, Charles B. W., Ford, Rochelle L., 2016-06-27 As more Americans are attending college historically black colleges and universities HBCUs are now in a position where they must directly compete with other institutions While other colleges and universities might have more resources and stronger infrastructures HBCUs provide better opportunities to meet the needs of students of color Setting a New Agenda for Student Engagement and Retention in Historically Black Colleges and Universities explores the innovations that HBCUs can enact to better serve and prepare the next generation of African American leaders and to be more competitive in the higher education landscape As students need different forms of support throughout their academic career it becomes necessary to engage them through mentorship programming and classroom management This book is a valuable resource for educators and administration at HBCUs sociologists policy makers and students studying education science and administration *The Rise of English* Rosemary Salomone, Rosemary C. Salomone, 2022 A sweeping account of the global rise of English and the high stakes politics of language Spoken by a quarter of the world's population English is today's lingua franca its common tongue The language of business popular media and international politics English has become commodified for its economic value and

increasingly detached from any particular nation This meteoric rise of English has many obvious benefits to communication Tourists can travel abroad with greater ease Political leaders can directly engage their counterparts Researchers can collaborate with foreign colleagues Business interests can flourish in the global economy But the rise of English has very real downsides as well In Europe imperatives of political integration and job mobility compete with pride in national language and heritage In the United States and England English isolates us from the cultural and economic benefits of speaking other languages And in countries like India South Africa Morocco and Rwanda it has stratified society along lines of English proficiency In *The Rise of English* Rosemary Salomone offers a commanding view of the unprecedented spread of English and the far reaching effects it has on global and local politics economics media education and business From the inner workings of the European Union to linguistic battles over influence in Africa Salomone draws on a wealth of research to tell the complex story of English and ultimately to argue for English not as a force for domination but as a core component of multilingualism and the transcendence of linguistic and cultural borders

Impact of Global University Ranking Systems on Developing Countries Onyancha, Omwoyo Bosire, Tella, Adeyinka, 2023-06-01 The emotive discourses on the subject of university rankings are directly linked to the effect of such rankings on the performance of universities throughout the world It has been observed that the top ranked universities attract major financial commitments from the industry the best students quality researchers and a wide range of other quality endowments such as equipment libraries and laboratories It is not surprising that the ranking of universities has gained popularity and become a significant factor shaping not only the reputation of universities but also the performance of said institutions around the world including the developing countries *Impact of Global University Ranking Systems on Developing Countries* presents a collection of perspectives from scholars and other stakeholders on the impact of the global ranking systems on developing countries The book is an additional resource for discussion and discourse as far as the global university ranking systems are concerned and opens new frontiers for further research Covering key topics such as assessment ethics and academic freedom this premier reference source is ideal for administrators policymakers researchers scholars academicians practitioners instructors and students

Multidimensional Ranking Frans A. van Vught, Frank Ziegele, 2012-02-21 During the last decades ranking has become one of the most controversial issues in higher education and research It is widely recognized now that although some of the current rankings can be severely criticized they seem to be here to stay In addition rankings appear to have a great impact on decision makers at all levels of higher education and research systems worldwide including in universities Rankings reflect a growing international competition among universities for talent and resources at the same time they reinforce competition by their very results Yet major concerns remain as to the rankings methodological underpinnings and to their various impacts This new book presents a comprehensive overview of the current state of the art of ranking in higher education and research and introduces a completely new approach called multidimensional ranking In part 1 rankings are

discussed in the broader context of quality assurance and transparency in higher education and research In addition the many current ranking methodologies are analyzed and critized and their impacts are explored In part 2 a new approach to ranking is introduced based on the basic idea that higher education and research institutions have different profiles and missions and that the performances of these institutions should reflect these differences This multidimensional approach is operationalized in a new multidimensional and user driven ranking tool called U Multirank U Multirank is the outcome of a pilot project sponsored by the European Commission in which the new ranking instrument was designed and tested at a global scale Personalauswahl international Anja Peitz,2002 **World University Rankings and the Future of Higher Education** Downing, Kevin,Ganotice, Jr., Fraide A.,2016-10-06 Delivering quality education to students while remaining competitive at an international level is only one of the many challenges universities face today To attain their goals universities must adopt new strategies to achieve academic excellence World University Rankings and the Future of Higher Education is a pivotal reference source for the latest scholarly research on the implementation of a ranking system for higher education institutions providing a thorough overview of the impacts of these rankings on educational quality Exploring the benefits and challenges of this system in a global context this book is ideally designed for academicians researchers students administrators and policy makers interested in the effects of university rankings in the education sector and beyond
