The Culture and Communities Mapping Project Morgan Currie,Melisa Miranda Correa,2022-01-01 This book describes three years of

work by the Culture and Communities Mapping Project a research project based in Edinburgh that uses maps as an object of study and also a means to facilitate research Taking a self reflexive approach the book draws on a variety of iterative mapping procedures and visual methodologies from online virtual tours to photo elicitation to capture the voices of inhabitants and their distinctive perspectives on the city The book argues that practices of cultural mapping consist of a research field in and of itself and it situates this work in relation to other areas of research and practice including critical cartography cultural geography critical GIS activist mapping and artist maps The book also offers a range of practical approaches towards using print and web based maps to give visibility to spaces traditionally left out of city representations but that are important to the local communities that use them Throughout the authors reflect critically on how through the processes of mapping we create knowledge about space place community and culture

The Wrong Carlos James S. Liebman, Shawn Crowley, Andrew Markquart, Lauren Rosenberg, 2014-07-08 In 1989 Texas executed Carlos DeLuna a poor Hispanic man with childlike intelligence for the murder of Wanda Lopez a convenience store clerk His execution passed unnoticed for years until a team of Columbia Law School faculty and students almost accidentally chose to investigate his case and found that DeLuna almost certainly was innocent They discovered that no one had cared enough about either the defendant or the victim to make sure the real perpetrator was found Everything that could go wrong in a criminal case did This book documents DeLuna s conviction which was based on a single nighttime cross ethnic eyewitness identification with no corroborating forensic evidence At his trial DeLuna s defense that another man named Carlos had committed the crime was not taken seriously The lead prosecutor told the jury that the other Carlos Carlos Hernandez was a phantom of DeLuna s imagination In upholding the death penalty on appeal both the state and federal courts concluded the same thing Carlos Hernandez did not exist The evidence the Columbia team uncovered reveals that Hernandez not only existed but was well known to the police and prosecutors He had a long history of violent crimes similar to the one for which DeLuna was executed Families of both Carloses mistook photos of each for the other and Hernandez s violence continued after DeLuna was put to death This book and its website thewrongcarlos.net reproduce law enforcement crime lab lawyer court social service media and witness records as well as court transcripts photographs radio traffic and audio and videotaped interviews documenting one of the most comprehensive investigations into a criminal case in U S history The result is eye opening yet may not be unusual Faulty eyewitness testimony shoddy legal representation and prosecutorial misfeasance continue to put innocent people at risk of execution The principal investigators conclude with novel suggestions for improving accuracy among the police prosecutors forensic scientists and judges

New York State Route 20N , Beginning Google Maps Applications with PHP and Ajax Jeffrey Sambells, Michael Purvis, Cameron Turner, 2007-12-22 Until recently building interactive web based mapping applications has been a cumbersome affair This changed when Google released its powerful Maps API Beginning Google Maps Applications with PHP and Ajax was written to help you take advantage of this technology

in your own endeavors whether you're an enthusiast playing for fun or a professional building for profit. This book covers version 2 of the API including Google's new Geocoding service. Authors Jeffrey Sambells, Cameron Turner, and Michael Purvis get rolling with examples that require hardly any code at all, but you'll quickly become acquainted with many facets of the Maps API. They demonstrate powerful methods for simultaneously plotting large data sets, creating your own map overlays and harvesting and geocoding sets of addresses. You'll see how to set up alternative tile sets and where to access imagery to use for them. The authors even show you how to build your own geocoder from scratch for those high volume batch jobs. As well as providing hands-on examples of real mapping projects, this book supplies a complete reference for the Maps API along with the relevant aspects of JavaScript, CSS, PHP, and SQL. Visit the authors' website for additional tips and advice.

Hands-On Data Visualization Jack Dougherty, Ilya Ilyankou, 2021-03-11 Tell your story and show it with data using free and easy-to-learn tools on the web. This introductory book teaches you how to design interactive charts and customized maps for your website, beginning with simple drag-and-drop tools such as Google Sheets, Datawrapper, and Tableau Public. You'll also gradually learn how to edit open-source code templates like Chart.js, Highcharts, and Leaflet on GitHub. Hands-On Data Visualization takes you step-by-step through tutorials, real-world examples, and online resources. This practical guide is ideal for students, nonprofit organizations, small business owners, local governments, journalists, academics, and anyone who wants to take data out of spreadsheets and turn it into lively interactive stories. No coding experience is required. Build interactive charts and maps and embed them in your website. Understand the principles for designing effective charts and maps. Learn key data visualization concepts to help you choose the right tools. Convert and transform tabular and spatial data to tell your data story. Edit and host Chart.js, Highcharts, and Leaflet map code templates on GitHub. Learn how to detect bias in charts and maps produced by others.

FileMaker Pro 10 Bible Ray Cologon, 2009-04-20 FileMaker Pro 10 Bible provides information that grows with you, no matter what your level when you start. Topics range from the general: how databases fit into real life and your business needs; comparisons with other database development tools; a broad discussion of integration with existing systems and software through the building blocks of FileMaker solutions; and on up to state-of-the-art advice on concepts of optimization, modularization, innovative and sophisticated user interface design, dynamic elements, logic, cutting-edge calculations, publishing your database to the Web, and integrating tightly with SQL databases via ESS. The book also includes the special developer tools available in FileMaker Pro Advanced and covers topics too often skipped over in other books on the market: backup, how to save, and strategies; must-read information about good database husbandry and file recovery; and so on. Much of the information in the book is documented nowhere else. This is the one must-have FileMaker book. Note: CD-ROM, DVD, and other supplementary materials are not included as part of the eBook file.
