Journal of Economic Literature ,2003 State Capital and Private Enterprise Daniel C. Kramer,2019-01-30 To what extent can governments supplement private venture capitalists and stimulate the economy by providing money to new entrepreneurs as well as existing enterprises The UK's National Enterprise Board NEB attempted to do just this and whilst it gained most publicity through its efforts to bail out ailing giants such as British Leyland and Rolls Royce Aerospace much of its attention was actually directed to smaller ventures Originally published in 1988 Professor Kramer reports that the NEB's record of success was surprisingly good and that many flourishing undertakings would not be in business today had it not been for the NEB's efforts The author goes further and after discussing the political and economic issues involved in according public aid to private enterprises on a case by case basis he argues that not only should the UK revive its NEB but that other countries notably the United States could benefit by establishing their own versions of it Indeed throughout the author's perspective as an outsider makes him peculiarly alive to the relevance of the UK example to a whole range of international cases As the first scholarly full length study of the NEB this book will be of value to those interested in the relationships between venture capitalists generally and the enterprises in which they take equity It will also interest those studying the relationship between holding companies and their subsidiaries **Subject Guide to Books in Print** ,1993
