MicroScan panels

Today's microbiology laboratories face continuous change—change in antimicrobial resistance, change in formulates and therapies, and change in the healthcare landscape. For more than 35 years, MicroScan systems have provided gold-standard bacterial identification and susceptibility products, confronting emerging resistance with speed and accuracy. Count on MicroScan systems for unmatched experience, expertise and selection.

MicroScan offers a broad choice of panel formats:

- Conventional overnight panels
- Rapid ID panels
- Specialty ID panels
- HiCROSTRIP plus panels
- ESBL plus panels

Fewest FDA limitations

MicroScan panels offer the fewest clinically significant FDA limitations and adhere to guidelines established by all the major microbiology standards organizations including Clinical and Laboratory Standards Institute (CLSI) and European Committee on Antimicrobial Susceptibility Testing (EUCAST).

Maximize your workflow flexibility with a choice of three panel testing options:

- ID-only
- AST-only
- ID/AST

“The rapid negative ID panels are very useful to us. We see a lot of challenging organisms with non-fermenters and these panels do an awesome job with these organisms.”
