existing research gaps as well as giving impetus for future studies and increasing communication about research on the professional development of EFL teachers in related disciplines. Aside from an overview of teaching primary EFL in Europe and beyond, the contributors are presenting up-to-date research on policy and practice of primary EFL teacher education in service training as well as professional competences and beliefs of primary EFL teachers. Edited by Eva Wilden and Raphaela Porsch, this interdisciplinary book provides contributions from Nora Benitt, Henriette Dausend, Ann Cathrin Deters, Philipp Janet Enever, Alicia Jckel, Johannes König, Angelika Kubanek, Sandra Lammerding, Rama Mathew, Gnter Nold, Annamaria Pinter, Thorsten Piske, Shelagh Rixon, Andreas Rohde, Henning Rossa, Bianca Roters, Sarah Strau, and Sarantis Tachtsoglou.

Resources in Education, 2001-04      **Reading Randomised Controlled Trials** Robert Savage, Amy Fox, Anneka Dawson, Helen Gray, Clare Huxley, 2025-03-03. In early 2021/22, the Flexible Phonics reading intervention, a large-scale randomised controlled trial, took place in 118 schools in England and involved nearly 3,000 children. This study aimed to provide valuable insights into the success of largely school-based education trials. The Flexible Phonics trial proved to be not only an important experiment in improving children's literacy but a case study in which the methodology of single randomised controlled trials in education can be considered. **Reading Randomised Controlled Trials** investigates the complexities of conducting randomised controlled trials in the field of education and how they can be seen as a cultural activity. The book emphasises the human operations, decision-making, and actions that drive such trials, which are often overlooked in published reports. Through the case study of Flexible Phonics, the book highlights the key differences between scaled educational trials and other types of trials, such as pharmaceutical trials. The additional focus on early childhood literacy is of significant educational importance, particularly in the context of UK school partial closures in 2020 and 2021 during the COVID-19 pandemic. **Reading Randomised Controlled Trials** is ultimately a unique resource on the implementation of randomised controlled trials in authentic school contexts and for the sustained improvement of practice in education.

Encyclopedia of Education and Human Development Stephen J. Farenaga, Daniel Ness, 2015-07-17. This comprehensive and exhaustive reference work on the subject of education, from the primary grades through higher education, combines educational theory with practice, making it a unique contribution to the educational reference market. Issues related to human development and learning are examined by individuals whose specializations are in diverse areas, including education, psychology, sociology, philosophy, law, and medicine. The book focuses on important themes in education and human development. Authors consider each entry from the perspective of its social and political conditions, as well as historical underpinnings. The book also explores the people whose contributions have played a seminal role in the shaping of educational ideas, institutions, and organizations, and includes entries on these institutions and organizations. This work integrates numerous theoretical frameworks with field-based applications from many areas in educational research.

*remote sensing special issue the use of hyperspectral remote* - Jun 15 2023

web advances in spaceborne hyperspectral remote sensing hrs and machine learning can help to support various remote sensing based applications including mineral exploration leveraging these advances the present study evaluates recently launched prisma spaceborne satellite images to map hydrothermally altered and weathered minerals

identification of minerals in hyperspectral imagery based on the - Apr 13 2023

web with the development of hyperspectral remote sensing the spectral resolution has become higher and higher so that a lot of mineral identification methods using hyperspectral imagery have been proposed gila yaron and eyal citation 2016

mineral exploration using hyperspectral data sciencedirect - Oct 07 2022

web jan 1 2020 application of hyperspectral remote sensing in mineral exploration potential uses of hyperspectral data in different geological applications are discussed in the literature hyperspectral data have been used to map surface alterations associated with different hydrothermal deposits

**a review of spatial enhancement of hyperspectral remote sensing** - Jul 24 2021

web feb 3 2023 remote sensing technology has undeniable importance in various industrial applications such as mineral exploration plant detection defect detection in aerospace and shipbuilding and optical gas imaging to name a few remote sensing technology has been continuously evolving offering a range of image modalities that can facilitate the

remote sensing free full text computational intelligence in - Aug 25 2021

web nov 12 2023 with the development of earth observation techniques vast amounts of remote sensing data with a high spectral spatial temporal resolution are captured all the time and remote sensing data processing and analysis have been successfully used in numerous fields including geography environmental monitoring land survey disaster
