Returning to Scientific Practice Xu Zhu, Wu Tong, 2019-05-17 This book is a result from a collective study on philosophy of scientific practice PSP which began around 2002 and still ongoing There is an apparently increasing interest in scientific practice influenced by the historicistic philosophy of science and the sociology of scientific knowledge SSK Prof WU Tong and his research group believe that it is necessary for PSP to turn from the theory dominant position to the practice dominance PSP has also put forward the possibility of reinterpreting the epistemic status of local knowledge in Chinese tradition which provides the most significant motivation to participate this study In this book we have selected three main cases namely Chinese medicine Fengshui and Ethnobotany to examine the effect of PSP The aim of our collective study is not merely on theoretical construction of PSP but also to consider the various applications of PSP especially for re interpreting and demonstrating the variety of local knowledge from traditional China which seems to be a genuine contribution to the international enterprise of philosophy of science particularly made by Chinese scholars Hayabusa2 Asteroid Sample Return Mission Masatoshi Hirabayashi, Yuichi Tsuda, 2022-04-14 Hayabusa2 Asteroid Sample Return Mission Technological Innovation and Advances covers the second Japanese asteroid sample return mission The purpose of the mission is to survey the asteroid Ryugu s surface features touch down on the asteroid form an artificial crater by shooting an impactor and collect sample materials This book covers these operations along with everything known about key technologies hardware and ground systems upon Hayabusa2 s return to Earth in 2020 This book is the definitive reference on the mission and provides space and planetary scientists with information on established technologies to further advance the knowledge and technologies in future space exploration missions 2023 PROSE Awards Winner Finalist Chemistry Physics Astronomy and Cosmology Association of American Publishers Broadly and comprehensively covers technologies necessary for space exploration missions Provides a unique focus on small body exploration missions Covers landing and impact experiments during the proximity operations of Hayabusa2 **Federal support for research and development**, 2007 Federal Support for Research and Development Sheila Marie Campbell, 2007 This Congressional Budget Office CBO study prepared at the request of the Ranking Member of the Senate Committee on the Budget examines recent trends in federal support for research and development and the current state of knowledge about the economic effects of that support Private businesses are the largest sponsors of research and development R however the federal government has long provided significant support for R D activities to both supplement and encourage private efforts The government finances research and development through spending and tax benefits that give businesses an incentive to increase their R D spending This study addresses questions such as whether the current level of spending is appropriate what returns taxpayers receive for public investment in R D and whether funds are allocated to areas of inquiry and projects that will provide the highest return on that investment Preface Return Ian Houston, 2024-02-09 It is the year 2312 and the City covers most of the planet Street

kid David North is a Super but his power moving strings wires and similar things with his mind isn't entirely under his control. During a violent altercation with one of the City's notorious gangs he is saved from near death by a couple of Super teenagers who are students of an underground scientific research and training facility called Project Arete. David immediately feels a curious connection with one of his saviors Sarah, a young woman with glowing green bionic eyes. During his recovery at Project Arete's hospital, David is given the opportunity to join PA and warily he takes it. Perhaps there finally off the City's streets he could learn more about his power and how to control it and more about Sarah. But there is someone who doesn't want David to get too close to her. And even though he is making lasting friendships as David spends more time at PA he discovers things are not exactly what they seem. An ancient mystery is slowly unfurling and when David finds himself caught up in a 3000 year old betrayal he must confront impossible choices to protect the ones he loves. But will his choices doom them all to repeat the mistakes of the ancient past?

The first book in the action packed Keystone Trilogy *Return* takes you deep inside a world where no choice is easy, no answer is the right one and every step you take comes with great responsibility.

The Return of Planet Sedna Jennifer T. Gehl, 2019-05-21

Reveals how the return of the planet Sedna after 11 000 years offers an opportunity for healing ourselves and our planet. Explores how the Inuit legend of the sea woman Sedna offers clues about the message of Sedna's return including a warning about the sustainability of our planet. Explains how Kundalini energy courses through planets and people alike and how planetary transits activate a form of cosmic Kundalini energy with Sedna's planetary return marking a major stage in this awakening process. Details how Sedna's energies can be harnessed for healing ourselves and our planet including how Earth's ley lines are mirrored within the body's meridians. Named after a mythological Inuit sea woman, the planet Sedna was first discovered in 2003. Its return to our solar system after 11 000 years of orbit has been tied to the huge tsunami that struck Indonesia, Thailand and India in 2004 as well as to the increased occurrence of other marine and weather events over the last decade. And just as it is affecting the waters of our planet, Sedna's energies are also affecting each of us as individuals. Exploring the impact that planetary bodies have on Earth and on humans, Jennifer Gehl reveals how Sedna's energies can be worked with for healing ourselves, others and the planet. She explains how the naming of this planet after the archetypal figure of Sedna and her myths provides major clues to the message that Sedna's return is sending: a clear warning about the sustainability of the planet and the oceans, the source of all life, and an invitation to awaken to the parts of ourselves that have been ignored, abandoned and cast out into the cold, just as Sedna was when she was drowned in the Arctic Ocean. The author examines the astrological chart for Sedna's discovery, providing an in-depth look at how certain aspects, particularly the quincunx, support the legend of Sedna and its impact on human health. She looks at how Kundalini energy courses through planets and people alike and how planetary transits activate a form of cosmic Kundalini energy with Sedna's return marking a major stage in this awakening process. She reveals how Earth's ley lines are mirrored within the body's meridians and offer a way to tune ourselves to the cosmic frequencies.

that Sedna brings Examining the story of Sedna mythologically and astrologically Gehl explains how Sedna's last appearance 11 000 years ago occurred at the end of the Ice Age when waters disrupted and divided our world Her return rather than being a harbinger of disaster is one of the way shower and shaman Symbolically she lights the path for us to ignite our own immortality by surrendering to the inner path revealing patterns and pathways for infinite healing potential a new model of sustainability for the health of our planet and a way to actively participate in our soul's evolution *Evaluating Science*

Franklin,2025-03-13 The decline in Secular Western morality can only be halted and reversed by a full return to Christianity Many people have a sense that the Western World is in decline and that our society is fragmenting around us Many people have an ominous sense that we are living at the end of a civilised age and are moving into something far less pleasant and humane But fewer people understand why this is happening In this new book Jamie Franklin argues that the reason for this decline is because we have jettisoned the underlying belief system that gave birth to the Western world and the Western mind in the first place Christianity He argues that there is a logical and inevitable link between the decline of Christianity and the decline of the West As our metaphysical commitment to Christianity declines so does our commitment to the benefits that came to us from Christianity Through captivating argument he demonstrates how this plays out in the scientific realm which has abandoned objectivity for dogmatism in the ethical realm which is eliminating humanity from its own formulations and in the political scene as it moves away from the democratic principle towards a neo marxist influenced nihilistic technocracy that threatens to eliminate human culture distinctiveness and agency in the pursuit of a globalist utopia In so doing Franklin touches on contemporary political conversations that are exercising the public imagination such as abortion euthanasia transhumanism and the rebirth of the totalitarian impulse in Western democracies Only a revival of Christianity can reverse these trends This book urges the Church to take seriously its own commitment to the metaphysical and ethical presuppositions of its own faith But also acknowledges the great challenge that Christianity faces as it threatens to be overwhelmed by the rising tide of secular nihilism that may yet engulf the Western World **Selected Irrigation Return**

European and Latin American Social Scientists as Refugees, Émigrés and Return-Migrants Ludger Pries, Pablo Yankelevich, 2018-10-28

During the 1930s thousands of social scientists fled the Nazi regime or other totalitarian European regimes mainly towards the Americas The New School for Social Research NCSR in New York City and El Colegio de México Colmex in Mexico City both were built based on receiving exiled academics from Europe Comparing the first twenty years of these organizations this book offers a deeper understanding of the corresponding institutional contexts and impacts of emigrated exiled and refugee academics It analyses the ambiguities of scientists situations between emigration return migration and transnational life projects and examines the corresponding dynamics of application adaptation or amalgamation of travelling theories and methods these academics brought Despite its institutional focus it also deals with the broader context of forced migration of intellectuals
