Using Artificial Intelligence Absolute Beginner's Guide Michael Miller, 2024-11-27 Using Artificial Intelligence Absolute Beginner's Guide Who knew how simple AI could be Using Artificial Intelligence Absolute Beginner's Guide will have you getting the most of popular AI tools in no time Here's a small sample of what you'll find inside Learn how AI can make everyday life easier Get tips for using AI to write gather information get advice and more Discover how to use AI to generate images that are realistic and fantastical Examine the risks and rewards of artificial intelligence Find step by step instructions for today's most popular AI tools including ChatGPT Google Gemini Meta AI Microsoft Copilot and Midjourney Find out how to tell when something is AI generated so you don't get fooled by deepfakes Artificial intelligence can be fun and productive if you know which tools to use and when Using Artificial Intelligence Absolute Beginner's Guide tells you all about today's major AI tools and shows how to get the best results from them You'll learn to use AI for turning your ideas into art writing a great email sharpening your resume and even sparking conversation Instantly research everything from planning a trip to making your next big purchase It's all a matter of picking the right AI tool and constructing the right prompt You'll also learn to protect yourself from the risks of AI and distinguish AI fakes from the real thing Everything you need to know is here in this book

How to Perform a Systematic Literature Review Edward Purssell, Niall McCrae, 2024-12-11 This new edition is an authoritative and accessible textbook to an activity that is often found overwhelming The systematic review is a rigorous method of collating and synthesizing evidence from multiple studies producing a whole greater than the sum of parts The authors steer readers on a logical path through the process taking account of the different needs of researchers students and practitioners in health and social care Practical guidance is provided on the fundamentals of systematic reviewing and also on advanced techniques such as meta analysis Examples are given throughout with a succinct glossary to support the text This new edition updates the first edition by considering a range of new and emerging issues in the systematic review process In particular The need for evidence to be systematically appraised in a timely manner particularly during public health emergencies and when urgent patient care issues are being considered The balance between speed and comprehensiveness New and developing areas of interest such as living reviews and rapid reviews both of which increased during Covid 19 Advances in methodologies and in particular meta analysis methods The introduction of AI and other automated processes of data management This up to date accessible textbook will satisfy the needs of students practitioners and educators in the sphere of health and social care The authors will advise some freely available or inexpensive open source access resources such as PubMed R and Zotero to help students how to perform a systemic review and to see how this informs the guideline and decision making process

Introduction to Foundation Models Pin-Yu Chen, Sijia Liu, 2025-06-12 This book offers an extensive exploration of foundation models guiding readers through the essential concepts and advanced topics that define this rapidly evolving research area Designed for those seeking to deepen their

understanding and contribute to the development of safer and more trustworthy AI technologies the book is divided into three parts providing the fundamentals advanced topics in foundation models and safety and trust in foundation models Part I introduces the core principles of foundation models and generative AI presents the technical background of neural networks delves into the learning and generalization of transformers and finishes with the intricacies of transformers and in context learning Part II introduces automated visual prompting techniques prompting LLMs with privacy memory efficient fine tuning methods and shows how LLMs can be reprogrammed for time series machine learning tasks It explores how LLMs can be reused for speech tasks how synthetic datasets can be used to benchmark foundation models and elucidates machine unlearning for foundation models Part III provides a comprehensive evaluation of the trustworthiness of LLMs introduces jailbreak attacks and defenses for LLMs presents safety risks when fine tuning LLMs introduces watermarking techniques for LLMs presents robust detection of AI generated text elucidates backdoor risks in diffusion models and presents red teaming methods for diffusion models Mathematical notations are clearly defined and explained throughout making this book an invaluable resource for both newcomers and seasoned researchers in the field

Ajay Kumar, Sangeeta Rani, Krishna Dev Kumar, Manish Jain, 2025-08-12 There is a need to categorize artificial intelligence AI applications tools techniques and algorithms based on their intended use in various design stages Specifically there is a need to explore AI techniques that are utilized for tasks such as designing including but not limited to inspiration idea and concept generation concept evaluation optimization decision making and modeling This includes things like generating ideas and concepts evaluating those ideas optimizing designs making decisions and creating models This handbook brings all of these categories with compatible AI techniques tools and algorithms together in one place Handbook of AI in Engineering Applications Tools Techniques and Algorithms covers applications of AI in engineering and highlights areas such as future cities mechanical system analysis and robotic process automation and presents the application of AI and the use of computerized systems that aim to simplify and automate the processes of design and construction of civil works The handbook discusses the design and optimization of mechanical systems and parts such as engines gears and bearings which can be automated using AI and it explores the performance of robotics and automation systems which can be simulated and analyzed using AI to forecast behavior spot future issues and suggest changes Rounding out this handbook is AI technology automation and how analyzing relevant data can provide a reliable basis for relevant personnel to carry out their work This handbook fills the gap between R D in AI and will benefit all stakeholders including industries professionals technologists academics research scholars senior graduate students government and public healthcare professionals

Generative AI: Principles, Techniques and Innovations Dr. Muthukumar Subramanian, Dr. Amit Shukla, Er. Arshadhafeez Khan, Dr. Tanmay Agrawal, 2025-03-04 Generative AI Principles Techniques and Innovations provides an in depth exploration of the field of Generative Artificial Intelligence presenting both theoretical foundations and practical implementations The book is structured into ten chapters covering essential topics such as machine learning fundamentals probabilistic models neural networks and various generative techniques including GANs VAEs and Diffusion Models The

latter sections delve into real world applications ethical considerations and the tools and frameworks essential for building generative models Readers will gain insights into AI s role in content creation synthetic data generation and medical imaging along with enterprise and research applications The final chapter discusses the future of Generative AI its integration with other AI domains and its potential to shape the digital landscape This book is crafted to be an accessible yet rigorous resource for students AI enthusiasts and professionals in the tech industry By blending theoretical discussions with practical examples we aim to provide a holistic view of Generative AI enabling readers to leverage its capabilities responsibly and effectively

Innovative Computing 2025, Volume 1 Hao-Shang Ma,Hwa-Young Jeong,Yu-Wei Chan,Hsuan-Che Yang,2025-07-02 This book comprises select proceedings of the 7th International Conference on Innovative Computing which was held in Bangkok Thailand Jan 19 23 2025 IC 2025 focusing on cutting edge research carried out in the areas of information technology science and engineering Some of the themes covered in this book are cloud communications and networking high performance computing architecture for secure and interactive IoT satellite communication wearable network and system infrastructure management etc The essays are written by leading international experts making it a valuable resource for researchers and practicing engineers alike

Generative AI for Effective Software Development Anh Nguyen-Duc,Pekka Abrahamsson,Foutse Khomh,2024-05-31 This book provides a comprehensive empirically grounded exploration of how Generative AI is reshaping the landscape of software development It emphasizes the empirical evaluation of Generative AI tools in real world scenarios offering insights into their practical efficacy limitations and impact By presenting case studies surveys and interviews from various software development contexts the book offers a global perspective on the integration of Generative AI highlighting how these advanced tools are adapted to and influence diverse cultural organizational and technological environments This book is structured to provide a comprehensive understanding of Generative AI and its transformative impact on the field of software engineering The book is divided into five parts each focusing on different aspects of Generative AI in software development As an introduction Part 1 presents the fundamentals of Generative AI adoption Part 2 is a collection of empirical studies and delves into the practical aspects of integrating Generative AI tools in software engineering with a focus on patterns methodologies and comparative analyses Next Part 3 presents case studies that showcase the application and impact of Generative AI in various software development contexts Part 4 then examines how Generative AI is reshaping software engineering processes from collaboration and workflow to management and agile development Finally Part 5 looks towards the future exploring emerging trends future directions and the role of education in the context of Generative AI The book offers diverse perspectives as it compiles research and experiences from various countries and software development environments It also offers non technical discussions about Generative AI in management teamwork business and education This way it is intended for both researchers in software engineering and for professionals in industry who want to learn about the impactof Generative AI on software development

Introduction to Python and Large Language Models Dilyan Grigorov, 2024-10-22 Gain a solid foundation for Natural Language Processing NLP and Large Language Models LLMs emphasizing their significance in today's computational world This book is an introductory guide to NLP and LLMs with Python programming The book starts with the basics of NLP and LLMs It covers essential NLP concepts such as text preprocessing feature engineering and sentiment analysis using Python The book offers insights into Python programming covering syntax data types conditionals loops functions and object oriented programming Next it delves deeper into LLMs unraveling their complex components You'll learn about LLM elements including embedding layers feedforward layers recurrent layers and attention mechanisms You'll also explore important topics like tokens token distributions zero shot learning LLM hallucinations and insights into popular LLM architectures such as GPT-4 BERT T5 PALM and others Additionally it covers Python libraries like Hugging Face OpenAI API and Cohere The final chapter bridges theory with practical application offering step by step examples of coded applications for tasks like text generation summarization language translation question answering systems and chatbots In the end this book will equip you with the knowledge and tools to navigate the dynamic landscape of NLP and LLMs What You'll Learn Understand the basics of Python and the features of Python 3.11 Explore the essentials of NLP and how they lay the foundations for LLMs Review LLM components Develop basic apps using LLMs and Python Who This Book Is For Data analysts AI and Machine Learning Experts Python developers and Software Development Professionals interested in learning the foundations of NLP LLMs and the processes of building modern LLM applications for various tasks **Getting Skills**

Right Training Supply for the Green and AI Transitions Equipping Workers with the Right Skills OECD, 2024-12-11 Adult learning systems are being called upon to prepare workers for major labour market shifts including the green transition and the rise of artificial intelligence AI in the workplace While initial education is important upskilling and reskilling the existing workforce is essential to help individuals and businesses adapt and prepare for these transitions Policy makers face the challenge of ensuring training is both relevant and inclusive yet there is limited understanding of whether current training supply is sufficient to meet current and future skill needs Most research focuses on the demand for skills with little insight into the supply To fill this gap this report uses evidence from new OECD questionnaires and an analysis of training catalogues to evaluate whether current training supply aligns with the skills needed for the green and AI transitions It also provides insight into the accessibility and flexibility of training efforts to guide policy makers in their efforts to develop more effective inclusive training strategies **The Handbook of Artificial Intelligence and Journalism** Aynur Sarisakaloğlu, Martin Löffelholz, 2025-12-23 Presents a comprehensive global overview of AI driven journalism and its transformative impact on media practices As artificial intelligence AI continues to reshape the media landscape The Handbook of Artificial Intelligence and Journalism provides the first comprehensive academic exploration of the intersection between AI technologies and journalism Edited by Aynur Sarisakaloğlu and Martin Löffelholz this foundational volume brings

together 37 leading scholars from six continents to examine how AI is redefining the structures practices and epistemologies of journalism Organized around key thematic areas the Handbook investigates the driving forces propelling the algorithmic transformation and unveils emerging trends in journalistic practice and journalism research moving beyond Western centric perspectives to incorporate diverse global experiences and knowledge production Twenty eight original chapters address systemic shifts such as evolving structures of media organizations changing roles of actors transformations in news production routines and shifting patterns of news consumption By integrating theoretical empirical and practical perspectives the Handbook sets the stage for a new research agenda for understanding AI driven journalism on a global scale Containing rigorous interdisciplinary scholarship and broad geographical coverage The Handbook of Artificial Intelligence and Journalism Integrates theoretical foundations empirical studies and practical applications in a cohesive structure Offers insights into journalism practices across a wide range of geographical contexts and engages with approaches that transcends Western dominated paradigms incorporating perspectives from the Global South Employs interdisciplinary frameworks to enhance the understanding of AI driven journalism Examines the sociotechnical dynamics of AI including its potential benefits and challenges for journalism Presents forward looking reflections on the future of journalism research in the AI era The Handbook of Artificial Intelligence and Journalism is ideal for undergraduate graduate and doctoral students in journalism communication and media studies programs It also serves as a vital reference for researchers educators media professionals and policy advisors engaged in digital journalism journalism research media innovation and public communication

AI in Education: A step-by-step Guide for Teachers and Students Mr. Jawahar Sri Prakash Thiagarajan, (Neuroscience, UK), Dr. Jeyashree Swaminathan, M.A., M.Ed., MLIS, M.Phil., Ph.D., Dr. Thiagarajan Sivaprakasam, M.Sc., Ph.D., 2024-10-15 AI in Education A Step by Step Guide for Teachers and Students is an essential resource for educators and students seeking to understand and implement artificial intelligence AI in modern educational settings This book provides a comprehensive exploration of AI concepts including machine learning neural networks and deep learning and their practical applications in the classroom Designed with both teachers and learners in mind the guide covers a wide range of topics Fundamentals of AI An introduction to AI its subfields and real world applications that enhance educational experiences AI Powered Tools Step by step guidance on using AI tools such as generative AI image recognition and personalized learning platforms Ethical Considerations A thoughtful examination of the ethical implications of AI in education focusing on fairness transparency and privacy Hands on Exercises Practical activities and scenario based examples that help educators and students apply AI in teaching and learning environments Future Trends Insights into the future of AI in education from AI driven lesson planning to adaptive learning technologies Whether you re an educator looking to enrich your teaching methods or a student eager to explore AI s potential this book offers the tools techniques and knowledge needed to navigate the evolving landscape of AI in education

Artificial Intelligence in Vocational Education and

Training Selena Chan,2025-05-30 This book details a series of studies across several levels of learning and vocational education and training VET discipline areas In the main the advent of natural language AI chatbots exemplified by ChatGPT has caused the educational sector to take on a defensive stance Both schools and the higher education sector are engaged in an on going arms race to prevent learners from using AI to augment assessments Therefore there has been a focus on plagiarism prevention rather than to better understand the potentialities for utilizing AI to support better learning This book explores the collaborative development and planning between educational developers learning designers and teachers to design learning activities which could leverage off various artificial intelligence AI platforms In doing support is provided for effective learning to be undertaken with an emphasis on the learning and application of critical thinking skills The studies presented through the volume describe the integration of AI literacy to support learners in evaluating the relevance and efficacy of AI tools and platforms and to understand how to best utilize these for specific purposes This book also synthesizes a framework for the introduction selection and implementation of AI into the VET curriculum It showcases recommendations and guidelines to inform the future integration of AI tools platforms into the VET curriculum

No-Code Artificial Intelligence Ambuj Agrawal,2023-03-07 A practical guide that will help you build AI and ML solutions faster with fewer efforts and no programming knowledge KEY FEATURES Start your journey to become an AI expert today Learn how to build AI solutions to solve complex problems in your organization Get familiar with different No code AI tools and platforms DESCRIPTION No Code Artificial Intelligence is a book that enables you to develop AI applications without any programming knowledge Authored by the founder of AICromo <https://aicromo.com> this book takes you through an array of examples that shows how to build AI solutions using No code AI tools The book starts by sharing insights on the evolution of No code AI and the different types of No code AI tools and platforms available in the market The book then helps you start building applications of Machine Learning in Finance Healthcare Sales and Cybersecurity It will also teach you to create AI applications to perform sales forecasting find fraudulent claims and detect diseases in plants Furthermore the book will show how to build Machine Learning models for a variety of use cases in image recognition video object recognition and data prediction After reading this book you will be able to build AI applications with ease WHAT YOU WILL LEARN Use different No code AI tools such as AWS Sagemaker DataRobot and Google AutoML Learn how to create a Machine Learning model to predict housing prices Build Natural Language Processing NLP models for Healthcare information Identification Learn how to build an AI model to create targeted customer offerings Use traditional ways to perform AI implementation using programming languages and AI libraries WHO THIS BOOK IS FOR This book is for anyone who wants to build an AI app without writing any code It is also helpful for current and aspiring AI and Machine Learning professionals who are looking to build automated intelligent and smart AI based solutions TABLE OF CONTENTS 1 What is AI 2 Getting Started with No Code AI 3 Building AI Model to Predict Housing Prices 4 Classifying Different Images 5 Building AI Model to Perform Sales
