Stephen J. Andriole

Stagram Picks Reddit Pro In The Us:

The Propagation of Misinformation in Social Media Richard Rogers, 2025-10-01 There is growing awareness about how social media circulate extreme viewpoints and turn up the temperature of public debate Posts that exhibit agitation garner disproportionate engagement Within this clamour fringe sources and viewpoints are mainstreaming and mainstream media are marginalized This book takes up the mainstreaming of the fringe and the marginalization of the mainstream In a cross platform analysis of Google Web Search Facebook YouTube Reddit Twitter Instagram 4chan and TikTok the authors found that hyperpartisan web operators alternative influencers and ambivalent commentators are in ascendancy The book can be read as a form of platform criticism It puts on display the current state of information online noting how social media platforms have taken on the mantle of accidental authorities privileging their own on platform performers and at the same time adjudicating between claims of what is considered acceptable discourse Conversations About Visiting and Managing the National Parks Robert E. Manning, Elizabeth E. Perry, 2024-12-11 As the popularity of the national parks grows so do the challenges of visiting and managing them This innovative book uses crowdsourcing postings by park visitors on a range of social media sites to start 100 conversations on issues associated with visiting and managing the national parks The authors then use their experience and expertise to prepare short plainspoken and engaging essays that respond to the postings and complete the conversations The book is written for park visitors managers and students This inventive thoughtful and inviting book addresses a wide range of national park related issues guides readers on how to more effectively plan and conduct their national park visits informs park planners and managers about what visitors think about the parks introduces the latest scientific and professional information on park management helps prepare students for careers in park management and enhances public appreciation and protection of the national parks How Executives Should Think About AI Stephen J. Andriole, 2025-09-30 Much of what is said about AI is misleading or just plain wrong It s also sometimes intended to frighten everyone about a future that s unlikely to occur think Bill Gates Elon Musk Steve Wozniak and Geoffrey Hinton among others AI will not steal children hold hostages for bitcoins or start nuclear wars But it will fundamentally change business through the intelligent automation of many routine and nonroutine tasks that companies perform all the time Old business models will die as fast as new ones emerge Whole industries will be reengineered reinvented and reimaged Some will be displaced altogether Some industries will be disrupted in every sense of the word in just three to five years In fact it s already begun How Executives Should Think About AI Straight Talk About the Inevitable prepares executives for the AI future It s not a complicated treatise on AI or a theoretical look at how new technology can transform business models and processes It s a series of conversations masquerading as chapters designed to help executives quickly understand AI what it can do and what they should do about AI machine learning ML and generative AI GenAI right now These conversations about AI are intended to get executives up to speed on AI ML and GenAI so that they become AI comfortable in many ways including launching a

steady stream of demonstration prototypes to help their companies explore AI's capabilities and potential benefits. These timely conversations can help executives understand how AI will impact their companies and their professional success. It's straight talk about the most important technology since the Internet. Executives have no choice but to embrace AI to accomplish their professional goals. This book helps accomplish these goals. It helps them make decisions about what AI can and cannot do for their companies.
