Olsthoorn, 2017-04-18 Most books and articles still treat leadership and ethics as related though separate phenomena This edited volume is an exception to that rule and explicitly treats leadership and ethics as a single domain Clearly ethics is an aspect of leadership and not a distinct approach that exists alongside other approaches to leadership This holds especially true for the military as it is one of the few organizations that can legitimately use violence Military leaders have to deal with personnel who have either used or experienced violence This intertwining of leadership and violence separates military leadership from leadership in other professions Even in a time that leadership is increasingly questioned it is still good leadership that keeps soldiers from crossing the thin line between legitimate force and excessive violence

Handbuch Militärische Berufsethik Thomas Bohrmann, Karl-Heinz Lather, Friedrich Lohmann, 2015-01-29 Im Fokus des zweiten Bandes steht die ethisch relevante Praxis in sicherheitspolitischen Entscheidungen im militärischen Alltag insbesondere aber auch im Kampfeinsatz Woraus beziehen Soldaten in der konkreten Situation ihre Handlungsmotivation welche Kompetenzen müssen Soldaten im 21. Jahrhundert verfügen und wie steht es um die Verantwortung der Politik für die Einsatzarmee Die Autorinnen und Autoren dieses Bandes gewähren authentische und praxisorientierte Einblicke in die Mehrdimensionalität des Soldatenberufs und seiner ethischen Implikationen **Pursuing Moral Warfare** Marcus

Schulzke, 2019-03-01 During combat soldiers make life and death choices dozens of times a day These individual decisions accumulate to determine the outcome of wars This work examines the theory and practice of military ethics in counterinsurgency operations Marcus Schulzke surveys the ethical traditions that militaries borrow from compares ethics in practice in the US Army British Army and Royal Marines Commandos and Israel Defense Forces and draws conclusions that may help militaries refine their approaches in future conflicts The work is based on interviews with veterans and military personnel responsible for ethics training review of training materials and other official publications published accounts from combat veterans and observation of US Army focus groups with active duty soldiers Schulzke makes a convincing argument that though military ethics cannot guarantee flawless conduct incremental improvements can be made to reduce war's destructiveness while improving the success of counterinsurgency operations *NL ARMS Netherlands Annual Review of*

Military Studies 2019 Wim Klinkert, Myriame Bollen, Marenne Jansen, Henk de Jong, Eric-Hans Kramer, Lisette Vos, 2019-07-16 This book has as its subject matter the academic education of officers and builds on the signing of the Bologna Declaration in 1999 by twenty nine European ministers for Education and Science who thereby agreed to coordinate higher education across Europe by for instance the implementation of the Bachelor's and Master's system In the meantime military academies have also introduced the BaMa system into their programs for officers' education which marks a transition from the old days when officers' education took place within a national military system under military command and was firmly grounded in principles traditions and needs as professed by the Ministries of Defence and the armed forces in particular So the Bologna

Declaration can be seen as crucial leverage for the development of in house academic degree programs as a fundamental part of officers education With this volume the editors of NL ARMS 2019 strive to offer a platform to both academics and military and civilian practitioners as well as to combinations of these to reflect and share their thoughts on officers education before and after Bologna both in The Netherlands and abroad To this end controversies and challenges affecting various aspects and systems of officers education have been grouped into five themes Respectively the first four themes comprise institutional settings and change educational philosophy educational challenges and reflective practices and didactical solutions The fifth theme international perspectives provides insights into the strategic environments and challenges faced by sister academies as well as ways to further officers education across Europe such as offered by Erasmus programs All the editors of this year s volume are affiliated with the Faculty of Military Sciences of the Netherlands Defence Academy in Breda The Netherlands

Case Studies in Ethics for Military Leaders William Rubel,2006 Making the Military Moral Don Carrick,James Connelly,David Whetham,2017-09-08 This book offers a critical analysis both theoretical and practical of ethics education in the military In the twenty first century it has become increasingly important to ensure that the armed forces of Western and other democracies fight justly and behave ethically The good soldier has to be not only professionally skilled but morally intelligent At a time of relentless media scrutiny the publicising of incidents of morally and legally unacceptable behaviour such as the gross mistreatment of prisoners and the torture of suspected terrorists can do much to undermine the credibility of those who claim to hold the moral high ground in any particular conflict Written by an international team of academic theorists and military practitioners this volume provides inter disciplinary insights into the present state and the future of ethics education in the militaries of Western democracies The contributors critically address the central question of whether such education is sufficient to prepare members of the armed forces to face the peculiar challenges of conflict environments that are now primarily wars among the people in which the opposing combatants may have little or no regard for human life and fail to discriminate between soldiers and civilians when choosing their targets Drawing lessons from recent examples of unethical conduct this original book offers insightful and constructive advice both theoretical and practical as to how situations can be improved and on the means that could and should be employed towards this end This book will be of much interest to students of military studies ethics and international relations

Military Robots Jai Galliot,2016-04-22 Philosophers have wrestled over the morality and ethics of war for nearly as long as human beings have been waging it The death and destruction that unmanned warfare entails magnifies the moral and ethical challenges we face in conventional warfare and everyday society Intrinsically linked are questions and perennial problems concerning what justifies the initial resort to war who may be legitimately targeted in warfare who should be permitted to serve the military the collateral effects of military weaponry and the methods of determining and dealing with violations of the laws of war This book provides a comprehensive and unifying analysis of the moral political and social questions concerning the rise of drone

warfare **When Soldiers Say No** Andrea Ellner, Paul Robinson, David Whetham, 2016-02-11 Traditionally few people challenged the distinction between absolute and selective conscientious objection by those being asked to carry out military duties The former is an objection to fighting all wars a position generally respected and accommodated by democratic states while the latter is an objection to a specific war or conflict theoretically and practically a much harder idea to accept and embrace for military institutions However a decade of conflict not clearly aligned to vital national interests combined with recent acts of selective conscientious objection by members of the military have led some to reappraise the situation and argue that selective conscientious objection ought to be legally recognised and permitted Political social and philosophical factors lie behind this new interest which together mean that the time is ripe for a fresh and thorough evaluation of the topic This book brings together arguments for and against selective conscientious objection as well as case studies examining how different countries deal with those who claim the status of selective conscientious objectors As such it sheds new light on a topic of increasing importance to those concerned with military ethics and public policy within military institutions government and academia

Utilitarianism and the Ethics of War William H. Shaw, 2016-02-15 This book offers a detailed utilitarian analysis of the ethical issues involved in war Utilitarianism and the Ethics of War addresses the two basic ethical questions posed by war when if ever are we morally justified in waging war and if recourse to arms is warranted how are we permitted to fight the wars we wage In addition it deals with the challenge that realism and relativism raise for the ethical discussion of war and with the duties of military personnel and the moral challenges they can face In tackling these matters the book covers a wide range of topics from pacifism to armed humanitarian intervention from the right of national defense to pre emptive or preventive war from civilian immunity to the tenets of just war theory and the moral underpinnings of the rules of war But what is distinctive about this book is that it provides a consistent and thorough going utilitarian or consequentialist treatment of the fundamental normative issues that war occasions Although it goes against the tide of recent work in the field a utilitarian approach to the ethics of war illuminates old questions in new ways by showing how a concern for well being and the consequences of our actions and policies shape the moral constraints to which states and other actors must adhere This book will be of much interest to students of the ethics of war just war theory moral philosophy war and conflict studies and IR

On Ops: Lessons and Challenges for the Australian Army since East Timor Tom Frame, Albert Palazzo, 2016-07-01 No one in the Australian government or Army could have predicted that in the 25 years following the end of the Cold War Army personnel would be deployed to Rwanda Cambodia Somalia Bougainville East Timor Afghanistan Iraq and the Solomon Islands In a constructive critique of the modern Australian Army On Ops examines the massive transformation that has taken place since troops were deployed to East Timor 1999 After decades of inactivity and the long peace of the 1970s and 1980s the Army was stretched to the limit Contributors include John Howard and Peter Leahy as well as Craig Stockings David Horner and an impressive array of military historians academics intelligence experts

and ex and current Army **Didactics of Military Ethics** Thomas R. Elßner, Reinhold Janke, 2016-04-08 The Iron Curtain fell over a quarter of a century ago. With it fell also the relatively straightforward Western assumption that war was going to be a bi-polar symmetrical affair albeit one with nuclear overtones, an assumption around which the training and education of military officers had hitherto been built. The immediate post-Cold War period showed officers wearing a blue rather than a green helmet negotiating with opponents whom they ought not to call enemies and keeping the peace in situations where there was no peace to keep. Added to this was the phenomenon of international terrorism which manifested itself on the strategic rather than merely the tactical level. Counter-insurgency operations in Iraq and Afghanistan demonstrate how difficult it is to win the hearts and minds of the local population while subduing the enemy at the same time. With the distinction between what is morally right and wrong becoming ever more blurred, the moral dilemmas of officers and men have begun to multiply and the need to reconsider the basic assumptions and practices of military ethics education in this highly unpredictable world has become ever more urgent. This volume arising out of a conference held at the Centre for Leadership Development and Civic Education of the German Armed Forces attempts to address that need. It offers the insights both of officers with combat experience and academics closely familiar with military training and uniquely bridges the gap between theory and practice in the teaching of military ethics. *The Ethics of Special Ops* Deane-Peter Baker, Roger Herbert, David Whetham, 2023-11-30 Addresses one largely overlooked trend in the field of military ethics: the emergence of special operations as an instrument of statecraft. **Justice and the Just War Tradition** Christopher J. Eberle, 2016-02-05 Justice and the Just War Tradition articulates a distinctive understanding of the reasons that can justify war, of the reasons that cannot justify war, and of the role that those reasons should play in the motivational and attitudinal lives of the citizens, soldiers, and statesmen who participate in war. Eberle does so by relying on a robust conception of human worth, rights, and justice. He locates this theoretical account squarely in the Just War Tradition. But his account is not merely theoretical. Justice and the Just War Tradition has a variety of practical aims, one of the most important of which is to serve as an aid to moral formation. The hope is that citizens, soldiers, and statesmen whose emotions and aspirations have been shaped by the Just War Tradition will be able to negotiate violent communal conflict in ways that respect the demands of justice. So Justice and the Just War Tradition articulates a theoretically satisfying and practically engaging account of the reasons that count in favor of war. Moreover, Eberle develops that account by engaging contemporary theorists both philosophical and theological, by according due deference to venerable contributors to the Just War Tradition, and by integrating insights from military memoir, the history of war, and the author's experience of teaching ethics at the United States Naval Academy. *Ethics in the Age of AI* Leo Lin, 2025-04-14 As artificial intelligence (AI) becomes increasingly integrated into the political and security landscape, it is essential to consider the ethical implications of this development. *Ethics in the Age of AI: Navigating Politics and Security* brings together leading experts to explore the complex moral dilemmas and opportunities

arising from the ever evolving AI landscape This book addresses a wide range of topics including the role of AI in political systems global geopolitics intelligence surveillance and the urgent need for ethical frameworks in AI governance It provides a critical analysis of AI s potential benefits and risks and offers guidance on ensuring that this technology is used responsibly and ethically This book is an essential guide for policymakers researchers and concerned citizens who want to shape a future where AI aligns with our shared values It is a timely and important book that will help us navigate the AI age s ethical challenges

Military Ethics Education and the Holocaust Michael Dobkowski, George R. Wilkes, 2025-11-18 This book examines the nature of military ethics education after the Holocaust using a range of national case studies The volume examines educational opportunities offered by a range of militaries including the USA Australia Lithuania Austria and Israel and addresses substantive and contextual problems for ethical reflection on the basis of Holocaust history The first half of the work indicates how the particular educational gains sought from courses on the Holocaust and military ethics provide grounds for wider discussions of the normative consequences of engagement with the Holocaust The chapters in the second half of the book turn to a variety of historical contexts before and during the Holocaust which raise substantive ethical issues the formation of military professionals treatment of prisoners exercise of responsibilities in the face of institutional pressure the relationship between ethical outcomes and organisational ideology and the values of rescuers and resisters including those organising their resistance in divergent Jewish and Christian communities This volume will be of interest to students of military ethics peace and conflict studies defence studies Holocaust and genocide studies and World War II history

Ethics Education for Irregular Warfare Don Carrick, James Connelly, Paul Robinson, 2016-05-13 Following on from *Ethics Education in the Military* eds Paul Robinson Nigel de Lee and Don Carrick Ashgate 2008 which surveyed and critically analyzed the existing theory and practice of educating soldiers sailors and airmen in the ethics of old fashioned warfaring this volume considers the extent to which such theory and practice is adequate to prepare members of the military to meet the more complex ethical challenges faced when engaging in irregular warfare in the 21st century In recent years events in Iraq and Afghanistan have highlighted the requirement that Western military personnel drawn from the armed forces of many different countries should behave in an ethical manner at all times The contributors to this volume come from various disciplinary backgrounds several are serving or former military officers and most are actively engaged in ethics education The volume advances theoretical understanding of different approaches to ethics education and provides practical conclusions
