South African Schooling: The Enigma of Inequality Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa s leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90/10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI

Professional Development for Inquiry-Based Science Teaching and Learning Olia E. Tsivitanidou, Peter Gray, Eliza Rybska, Loucas Louca, Costas P. Constantinou, 2018-09-03 This book examines the implementation of inquiry based approaches in science teaching and learning It explores the ways that those approaches could be promoted across various contexts in Europe through initial

teacher preparation induction programmes and professional development activities It illustrates connections between scientific knowledge deriving from the science education research community teaching practices deriving from the science teachers community and educational innovation Inquiry Based Science Teaching and Learning IBST L has been promoted as a policy response to pressing educational challenges including disengagement from science learning and the need for citizens to be in a position to evaluate evidence on pressing socio scientific issues Effective IBST L requires well prepared and skilful teachers who can act as facilitators of student learning and who are able to adapt inquiry based activity sequences to their everyday teaching practice Teachers also need to engage creatively with the process of nurturing student abilities and to acquire new assessment competences The task of preparing teachers for IBST L is a challenging one This book is a resource for the implementation of inquiry oriented approaches in science education and illustrates ways of promoting IBST L through initial teacher preparation induction and professional development programmes

Making Open Development

Inclusive Matthew L. Smith, Ruhiya Kristine Seward, 2020-08-25 Drawing on ten years of empirical work and research analyses of how open development has played out in practice A decade ago a significant trend toward openness emerged in international development Open development can describe initiatives as disparate as open government open health data open science open education and open innovation The theory was that open systems related to data science and innovation would enable more inclusive processes of human development This volume drawing on ten years of empirical work and research analyzes how open development has played out in practice Focusing on development practices in the Global South the contributors explore the crucial questions of who is allowed to participate when an initiative is open and who benefits or not from them finding that processes characterized as open can sometimes be exclusionary in their implementation Examining a wide range of cases they consider the governance of open development ecosystems and the implementation of a variety of applications including open educational resources collaborative science and the uses of crowdsourcing
