

Mind vs. Money

Mind vs. Money

- Entrepreneurial environment is full of challenges and the entire team is bound to face them. Now the question is, what is more important, mind or money, as both are vital elements for an entrepreneur.
- For established entrepreneurs, mind is more important than money as they have already invested as well as earned, and now they are in a

Mind to Matter Dawson Church, 2018-06-12 Best Health Book of 2018 American Book Fest Best Science Books of 2018 Bookbub Every creation begins as a thought from a symphony to a marriage to an ice cream cone to a rocket launch When we have an intention a complex chain of events begins in our brains Thoughts travel as electrical impulses along neural pathways When neurons fire together they wire together creating electromagnetic fields These fields are invisible energy yet they influence the molecules of matter around us the way a magnet organizes iron filings In Mind to Matter award winning researcher Dawson Church explains the science showing how our minds create matter Different intentions produce different fields and different material creations The thoughts and energy fields we cultivate in our minds condition the atoms and molecules around us We can now trace the science behind each link in chain from thought to thing showing the surprising ways in which our intentions create the material world The science in the book is illustrated by many authentic case histories of people who harnessed the extraordinary power of the mind to create They include Adeline whose Stage 4 cancer disappeared after she imagined healing stars Raymond Aaron and two of his clients each of whom manifested 1 million in the same week Elon Musk who bounced back from devastating tragedy to found Tesla and SpaceX Graham Phillips who grew the emotional regulation part of his brain by 22.8% in two months Jennifer Graf whose grandfather's long dead radio came to life to play love songs the day of her wedding Harold whose 80% hearing loss reversed in an hour Joe Marana whose deceased sister comforted him from beyond the grave Rick Geggie whose clogged arteries cleared up the night before cardiac surgery Matthias Rust a teen whose airplane flight for peace changed the fate of superpowers Wanda Burch whose dream about cancer told the surgeon exactly where to look for it An MIT freshman student who can precipitate sodium crystals with his mind John who found himself floating out of his body and returned to find his AIDS healed Dean whose cortisol levels dropped by 48% in a single hour In Mind to Matter Dawson Church shows that these outcomes aren't a lucky accident only a few people experience Neuroscientists have measured a specific brain wave formula that is linked to manifestation This flow state can be learned and applied by anyone New discoveries in epigenetics neuroscience electromagnetism psychology vibration and quantum physics connect each step in the process by which mind creates matter They show that the whole universe is self organizing and when our minds are in a state of flow they coordinate with nature's emergent intelligence to produce synchronous outcomes The book contained over 150 photos and illustrations that explain the process while an Extended Play section at the end of each chapter provides additional resources As Mind to Matter drops each piece of the scientific puzzle into place it leaves us with a profound understanding of the enormous creative potential of our minds It also gives us a road map to cultivating these remarkable brain states in our daily lives

Reason and Restitution Charlie Webb, 2016-02-11 In law gains like losses don't always lie where they fall The circumstances in which the law requires defendants to give up their gains are well documented in the work of unjust enrichment lawyers The same cannot be said

however of the reasons for ordering restitution of such gains It is often suggested that unjust enrichment's existence can be demonstrated without inquiry into these reasons into the principles of justice it represents and invokes Yet while we can indeed show that there exists a body of claims dealing with the recovery of mistaken payments and the like without going on to inquire into their rationale this isn't true of unjust enrichment's existence as a distinct ground of such claims If unjust enrichment exists as a body of like cases and claims truly independent of contract and tort it does so by virtue of the distinct reasons it identifies and to which these claims respond Reason and Restitution examines the reasons which support and shape claims in unjust enrichment and how these reasons bear on the law's resolution of these claims The identity of these reasons matters For one thing unjust enrichment's status as a distinct ground of liability depends on the distinctiveness of these reasons But more importantly it matters to those charged with the practical tasks of deciding cases and making laws for it is these reasons alone which can direct how judges and legislators ought to respond to these claims
