development of the American economy and Big Business over four centuries and how the individual and collective actions of Americans native born and foreign came to create the 12 6 trillion economy of today Although the building American juggernaut was blessed above other nations with all manner of natural resources the inventiveness and drive of the American people made the most of what Providence had bestowed Steadily then more swiftly the foundation was laid for success More intimate knowledge of economic reality and theory in the 20th century led ultimately to the world's greatest economy of today At time of this writing in 2006 following a presidential election campaign characterized by harsh criticism of special moneyed interests and foreign outsourcing of labor many Americans have taken a dim view of Big Business and the federal government's management of the economy This book does not shrink from pointing out episodes of corporate greed and
