Medical Bulletin of the U.S. Army, Europe United States. Army, Europe. Medical Division, 1981 **Ethical Practice in Operational Psychology** Thomas J. Williams, Carrie H. Kennedy, 2011 In the late 1990s a number of psychologists who

supported national security programs would meet monthly to collaboratively discuss program and research initiatives The need for psychologists to remain focused on a professional and ethical practice of psychology in support of national security operations was a frequent topic of those meetings Thus the meetings often served as professional peer consultations in a practice domain that has come to be known as operational psychology Various potential and real ethical conflicts related to the practice of psychology in support of national security missions were addressed in those meetings Many of those discussions serve as the foundational impetus for this book It also goes without saying that the dramatic increase in relevance and practice of operational psychologists in a post 9 11 world reinforces the need to bring that foundation into a structure of practice This volume is intended to help frame that structure and guide those operational psychologists who now face a vast array of complex challenges around the world It is our intention that this volume provide firsthand knowledge about the key areas of operational psychological practice and the ethical analysis needed to operate in this relatively uncharted territory Book PsycINFO Database Record c 2010 APA all rights reserved

Handbook of Neuropsychology,1988 **Handbook of Neuropsychology** F. Boller,François Boller,1988 In recent years there has been an enormous increase in interest into disorders of higher cortical functions and into brain behavior relationships The Handbook of Neuropsychology has been planned as a reference source that will provide for the first time comprehensive and current coverage of both experimental and clinical aspects of neuropsychology The chapter authors have produced in depth reviews that go beyond a summary of their results and points of view Each chapter is up to date covering the latest developments in methodology and theory Discussion of bedside evaluations laboratory techniques as well as theoretical models are all to be found in the Handbook In addition the editors have attempted to make the Handbook as coherent as possible by encouraging minimal overlap in topic matter The first section introduces historical developments in neuropsychology approaches to the clinical and experimental assessment of higher cortical functions as well as statistical and methodological issues In addition the introduction covers cerebral dominance and specialization as well as models of cognition Section 2 Topic Editor Professor G Rizzolatti deals with normal and disordered attentional processes in experimental animals and in humans Section 3 Topic Editor Professor H Goodglass encompasses language aphasia and related disorders it is shared over Volumes 1 and 2 This section emphasizes both the classical syndromes of aphasic disorders as well as the contribution of modern neurolinguistics Special issues include bilingual and polyglot aphasia disorders of sign language aphasia in left handers as well as recovery and therapy of aphasia This section concludes with chapters on disorders of gestural behavior and apraxia The Neuropsychology Handbook: Foundations and assessment Arthur MacNeill Horton,Danny Wedding,Jeffrey Webster,1997
