Millimetre Wave Optics Devices And Systems:

Millimetre-Wave Optics, Devices and Systems J.C.G Lesurf,1990-01-01 The millimetre wavelength region of the electromagnetic spectrum is increasingly exploited for a wide range of commercial industrial and military applications Conventionally this region is considered as lying above microwaves and below the infrared Hence in practice millimetre wave scientists have tended to pick and mix useful techniques on an empirical basis from both these areas Millimetre Wave Optics Devices and Systems describes the fundamental physics of the quasi optical techniques devices and system design for instruments processing millimetre wave signals Relevant ideas from Gaussian beam mode theory and antenna and transmission line theory are brought together to show the underlying unity of optics and electronics Aimed at advanced undergraduates and postgraduates as well as millimetre wave laser optics antenna and microwave engineers this book will also be of interest to manufacturers of millimetre wave and microwave equipment

Diffractional Optics of Millimetre Waves I.V. Minin,O.V. Minin,2004-09-01 Diffractional Optics of Millimetre Waves combines those elements of diffraction theory normally associated with optics including Gaussian beams lenses and mirrors and extends them into the micro and millimetre wavelength range In this regime there are a number of applications in devices such as automobile proximity sensors satellite TV receiving antennae and non destructive testing systems Researchers working in these areas would benefit from greater understanding of the diffraction phenomena involved A translated and updated version of the authors book Diffraction Quasioptics this book will present results formerly unavailable in the general literature

Broadband Access and Network Management D. W. Faulkner,A. L. Harmer,1998 **Very High Frequency (VHF) ESR/EPR** Oleg Grinberg,Lawrence J. Berliner,2013-11-09 The field of Very High Frequency EPR VHF EPR or sometimes called Very High Field EPR conveniently also abbreviated as VHF EPR has blossomed during the past decade especially after the original pioneering work of Ya S Lebedev and his group at the Institute of Chemical Physics Russian Academy of Sciences in Moscow Although Lebedev suffered heavily under the economic constraints of the communist Soviet Union and then succumbed to cancer at the peak of his scientific career his

groundbreaking work from the 1970 s is still considered today to be the gold standard by researchers practicing EPR at high magnetic fields A stimulus for the production of this book is the legacy of Yakov Levedev in his students now residing in academic positions in the US and elsewhere The aim of this book is to highlight the state of this growing field This is an attempt to cover the full scope of VHF EPR in a single volume The idea for this volume came to the editors at the 2001 Rocky Mountain Analytical Conference during the 24th International EPR Symposium chaired by Sandra and Gareth Eaton VHF EPR was presented as an independent research field at a workshop organized by LC Brunei and supported by the National High Magnetic Field Laboratory a National Science Foundation funded facility at Florida State University
