## **Mind Blowing Modular Origami The Art Of Polyhedral Paper Folding:**

*Mind-Blowing Modular Origami* Byriah Loper, 2016-10-11 Modular origami is the latest craze in paper folding. These three dimensional models are created from a number of small pieces of paper that are easily folded and then cleverly fit together to form a spectacular shape. They range from paper polyhedra to bristling buckyballs that are reminiscent of sea urchins to ornate flower like spheres. Each piece of paper is held by the tension of the other papers demonstrating the remarkable hidden properties of paper which is at the same time flexible but also strong. Author Byriah Loper has been creating modular origami sculptures for just five years but in that time he has pushed the upper limits of the art form with some of the largest most complex geometric paper constructions ever assembled. While many geo modular origami artists focus on creating dense floral spheres, Byriah has pioneered the open linear wire frame approach which results in a very complex looking model that reveals the interior of its form. He exhibits his sculptures annually at the Origami USA convention in New York and was recently a featured artist at the Surface to Structure exhibition at the Cooper Union gallery in the East Village. A great way to learn origami, the easy to follow diagrams and step by step instructions in this book show you how to fold the paper components and then assemble them to create 22 incredible models. Each model is a new challenge and the paper sculptures you create look fantastic on your desk or shelf.

*Mind-blowing Modular Origami* Byriah Loper, 2016. Modular origami is the latest craze in paper folding. *Mind-Blowing Kusudama Origami* Byriah Loper, 2024-03-26 Discover the intricate world of modular Kusudama paper folding. Kusudama are elaborate geodesic spheres assembled from many small folded pieces of paper. They were originally used to hold incense in Japanese Buddhist temples. Modern Kusudama consist of dozens of colorful papers folded and fitted together to form ornate spherical sculptures. In this exciting new book, master paper folder Byriah Loper presents 30 of his own original and spectacular Kusudama creations including Capstone, a spiky sphere resembling a sea urchin; Ortygia, an unusual cube shaped Kusudama; Shakespeare, an elaborate model resembling a ball of flowers; Trallia, a ball with petal like projections that looks like a huge chrysanthemum. Plus many other incredible models. Assembling Kusudama is an exciting challenge, however, Loper's clear diagrams and detailed step by step photos and instructions make the art accessible to anyone, even if you have no prior origami or paper folding experience. And the astonishing finished pieces are well worth the effort.
