Perona,C. A. Brebbia,2010 As in the past future forest fire scenarios are impacted by climatic trends and changes in climatic extremes as well as by anthropic pressure It is to be expected that future trends especially in the Mediterranean regions will certainly lead to an increasing impact of human pressure on the natural environment due to increases in tourism and to the enlargement of urban residential areas invading the countryside Forecasting the effects of both factors climatic and anthropic and separating their effects on forest fires frequencies may be particularly difficult but is essential to improve our knowledge of forest fire occurrence probability and to better organize prevention and fighting activities At the same time estimation of the possible increase of fire risk over coming years is important taking into account also the diverse fire prone environments present in the Mediterranean as well as many other areas mountain slopes coastal zones large islands etc This book contains peer reviewed papers presented at the Second International Conference on Modelling Monitoring and Management of Forest Fires held in Kos Greece in 2010 The papers covered important topics in the field of prevention and fighting of forest fires including Computational Methods and Experiments Air Quality and Health Risk Models Detection Monitoring and Response Systems Decision Support Systems Resource Optimization Risk Assessment and Vulnerability Assessment Routledge Handbook of Sustainable and Resilient Infrastructure Paolo Gardoni,2018-12-17 To best serve current and future generations infrastructure needs to be resilient to the changing world while using limited resources in a sustainable manner Research on and funding towards sustainability and resilience are growing rapidly and significant research is being carried out at a number of institutions and centers worldwide This handbook brings together current research on sustainable and resilient infrastructure and in particular stresses the fundamental nexus between sustainability and resilience It aims to coalesce work from a large and diverse group of contributors across a wide range of disciplines including engineering technology and informatics urban planning public

Davies,1997 During the years 1797-1820 the Qasimi Arabs or Qawasim inhabitants of the present day United Arab Emirates acquired an enduring reputation as ruthless pirates Some of their victims flew the British flag and thus their actions were to provide the initial stimulus and justification for 150 years of British involvement in the Gulf Recently however it has been doubted whether the Qawasim were in fact pirates In a scholarly but accessible account founded on contemporary sources illustrated with testimonies of eye witnesses and participants this book sets out to decide this controversial question By making use of valuable and hitherto untapped archival material Charles Davies strongly evokes a flavour of life in the Gulf in this turbulent and formative period in the Gulf's history This book represents the first in depth investigation into this controversial subject It is based on original research and helps to explain why the Gulf is as it is today
