### **Miniature Golf Using Triangle:**

Challenging Units for Gifted Learners Kenneth J. Smith, Susan Stonequist, 2021-09-03 Gifted students have the potential to learn material earlier and faster to handle more complexity and abstraction and to solve complex problems better. This potential however needs stimulating experiences from home and school or it will not unfold. These books are designed to help teachers provide the stimulating curricula that will nurture this potential in school. The units presented in this series are based on research into how these students actually think differently from their peers and how they use their learning styles and potential not merely to develop intellectual expertise but to move beyond expertise to the production of new ideas. The Math book includes units that ask students to develop a financial portfolio that includes high and low risk stocks, options and margins, AAA and junk bonds, mutual funds and money markets, use math, science, engineering, technology and art to design and build a miniature golf course, develop games based on probability and run a real life small business. Grades 6-8

**Running Dogs and Rose's Children** Eric George de Jong, *Running Dogs and Rose's Children* tell the story of how Eric and wife Jenny are plunged into parenthood after adopting three siblings aged eleven, five and one after their mother died of cancer. The new family set about starting over, building a family life together from scratch in their rambling farmhouse outside Harare, Zimbabwe. Their story was on course for a happily ever after ending until their lives and the lives of those around them were destroyed by Robert Mugabe's war of terror unleashed on white farmers and opposition party members, launching an era of economic, social and political turmoil which eventually saw the family fleeing the country for fear of being killed. Eric's fierce love of his country and his principles saw him immersing himself in the dangerous opposition politics of the day where elections were rigged and fellow party members were tortured and murdered. Somehow Eric de Jong's irrepressible sense of humour bubbles throughout this absorbing, honest and deeply personal account of a growing family of love, entrepreneurial success and failure, mental illness, political exile and the distressing and often absurd collapse of a beautiful African country and stoicism of its people.
