The Market Imperative Robert Zemsky,Susan Shaman,2017-12-22 Thinking about American higher education as an economic market changes everything It is no surprise that college tuition and student debt are on the rise Universities no longer charge tuition to simply cover costs They are market enterprises that charge whatever the market will bear Institutional ambition along with increasing competition for students now shape the economics of higher education In *The Market Imperative* Robert Zemsky and Susan Shaman argue that too many institutional leaders and policy makers do not understand how deeply the consumer markets they promoted have changed American higher education Instead of functioning as a single integrated industry higher education is in fact a collection of segmented and more or less separate markets These markets have their own distinctive operating constraints and logics especially regarding price But those most responsible for federal higher education policy have made a muck of the enterprise while state policy making has all but disappeared the victim of weak imaginations insufficient funding and an

aversion to targeted investment Chapter by chapter this compelling text draws on new data developed by the authors in a Gates Foundation funded project to describe the landscape how the market for higher education distributes students among competing institutions what the job market is looking for how markets differ across the fifty states and how the higher education market determines the kinds of faculty at different kinds of institutions The volume concludes with a three pronged set of policies for making American higher education mission centered as well as market smart Although there is no one size fits all approach for reforming higher education this clearly written book will productively advance understanding of the challenges colleges and universities face by providing a mapping of the configuration of the market for an undergraduate education

The Impoverishment of the American College Student James V. Koch, 2019-07-09 Is the end in sight for college tuition hikes Tuition and fees at public colleges and universities consistently have risen twice or even three times as fast as comparable increases in the Consumer Price Index in recent years Since 2000 these costs have even grown 60 percent faster than health care costs The results have been rapidly rising student debt now 1.4 trillion nationally rising delinquencies in debt repayment and a dysfunctional stratification of public college student bodies on the basis of family incomes This is a broken unsustainable model for the majority of public colleges Why has this occurred The multiple causes include declining state support the avaricious behavior of individual institutions their reluctance to adopt productivity increasing innovations their cost increasing competition for higher U.S. News ratings and misdirected federal student financial aid policies The key actors are the 50,000 members of the governing boards of public colleges who too often forget that their primary responsibility is to citizens taxpayers and the 15 million students Instead board members are co-opted by clever administrators into approving tuition and fee increases well beyond what is needed to make up for declining state funding Concerted informed public pressure on governors legislators and board members is necessary to move institutions in more positive directions Higher education funding and tuition and fee inflation are complicated matters that very few people understand well The Impoverishment of the American College Student clarifies the central issues and provides plentiful data to support its key points It is a must read for anyone who believes that maintaining

access to and the affordability of public colleges are vitally important to our society's future *Top Student, Top School?* Alexandria Walton Radford, 2013-06-07 Most of us think that valedictorians can write their own ticket. By reaching the top of their class they have proven their merit so their next logical step should be to attend the nation's very best universities. Yet in *Top Student Top School* Alexandria Walton Radford of American Institutes for Research reveals that many valedictorians do not enroll in prestigious institutions. Employing an original five state study that surveyed nine hundred public high school valedictorians she sets out to determine when and why valedictorians end up at less selective schools showing that social class makes all the difference. Radford traces valedictorians' paths to college and presents damning evidence that high schools do not provide sufficient guidance on crucial factors affecting college selection such as reputation, financial aid, and even the application process itself. Left in a bewildering environment of seemingly similar options, many students depend on their parents for assistance and this allows social class to rear its head and have a profound impact on where students attend. Simply put, parents from less affluent backgrounds are far less informed about differences in colleges' quality, the college application process, and financial aid options which significantly limits their child's chances of attending a competitive school even when their child has already managed to become valedictorian. *Top Student Top School* pinpoints an overlooked yet critical juncture in the education process, one that stands as a barrier to class mobility. By focusing solely on valedictorians it shows that students' paths diverge by social class even when they are similarly well prepared academically and this divergence is traceable to specific failures by society that we can and should address. Watch an interview of Alexandria Walton Radford discussing her book here <http://www.youtube.com/watch?v=F81c1D1BpY0> **Higher Education Accountability** Robert Kelchen, 2018-02-27 The first comprehensive overview charting the accountability of higher education. As the price tag of higher education continues to rise, colleges and universities across the country are under increasing pressure to demonstrate their value. Graded on numerous metrics including cost and ability to prepare students for the job market, colleges must satisfy requirements from multiple stakeholders. State and federal governments demand greater accountability. Foundations and private donors, as well as today's parents and students, approach education with a consumer sensibility. How can colleges navigate these pressures while trying to stay true to their missions and values? In *Higher Education Accountability* Robert Kelchen delivers the first comprehensive overview of how colleges in the United States came to face such overwhelming scrutiny. Beginning with the earliest efforts to regulate schools, Kelchen reveals the rationale behind accountability and outlines the historical development of how federal and state policies, accreditation practices, private sector interests, and internal requirements have become so important to institutional success and survival. With so many diverse and conflicting entities holding colleges responsible for their performance, the variety of accountability systems in play can have both intended and unintended consequences. Immersed as they are in current debates about how best to respond to these pressures, faculty and administrators will welcome this up-to-date and timely account which offers

not only a look at current practices but also an examination of the future of accountability in American higher education
