Global University Rankings T. Erkkilä, 2013-09-26 Global University Rankings explores the novel topic of global university rankings and their effects on higher education in Europe The contributions in this volume outline different discourses on global university rankings and explore the related changes concerning European higher education policies disciplinary traditions and higher education institutions The first global university rankings were published less than a decade ago but these policy instruments have become highly influential in shaping the approaches and institutional realities of higher education The rankings have portrayed European academic institutions in a varying light There is intense reflexivity over the figures leading to ideational changes and institutional adaptation that take surprisingly similar forms in different European countries The contributions in this book critically assess global university rankings as a policy discourse that would seem to be instrumental to higher education reform throughout Europe Rankings and the Reshaping of Higher Education E. Hazelkorn, 2011-03-08 University rankings have gained popularity around the world and are now a significant factor shaping reputation This book is the first comprehensive study of rankings from a global perspective making an important contribution to our understanding of the rankings phenomenon This book has also been published in Japanese

The Alumni Factor The Alumni Factor, 2013-09-10 This book began with a simple premise that there is a better way to assess and rank colleges and universities in America than those currently being offered The primary outcomes of most of today's rankings are 1 To provide readers a view of what life is like as an undergraduate and 2 To give insight into who comes into the college The Alumni Factor on the other hand is more interested in who comes out The aim of this guide is to describe how well a college or university actually develops and shapes its students and what becomes of them after they graduate The Alumni Factor is interested in the actual outcomes experienced by college graduates and the role their college played in creating those outcomes The Alumni Factor believes this information regarding graduate outcomes is truly essential to understanding and assessing our colleges and universities today In line with these goals The Alumni Factor provides a detailed in depth profile of graduates from 225 of our nation's top colleges The profiles were constructed almost entirely with data and insights from the actual college alumni themselves Readers will find The Alumni Factor to be a fascinating look at the incredibly diverse academic social and cultural choices available to capable students today **World University Rankings and the Future of Higher Education** Downing, Kevin, Ganotice, Jr., Fraide A., 2016-10-06 Delivering quality education to students while remaining competitive at an international level is only one of the many challenges universities face today To attain their goals universities must adopt new strategies to achieve academic excellence World University Rankings and the Future of Higher Education is a pivotal reference source for the latest scholarly research on the implementation of a ranking system for higher education institutions providing a thorough overview of the impacts of these rankings on educational quality Exploring the benefits and challenges of this system in a global context this book is ideally

designed for academicians researchers students administrators and policy makers interested in the effects of university rankings in the education sector and beyond

The Best Kind of College Susan McWilliams, John E. Seery, 2015-07-06 The fevered controversy over America's educational future isn't simply academic those who have proposed sweeping reforms include government officials politicians foundation officers think tank researchers journalists media pundits and university administrators Drowned out in that noisy debate are the voices of those who actually teach the liberal arts exclusively to undergraduates in our nation's small liberal arts colleges or SLACs The Best Kind of College attempts to rectify that glaring oversight As an insiders guide to the liberal arts in its truest form the volume brings together thirty award winning professors from across the country to convey in various ways some of the virtues the electricity and overall the importance of the small seminar face to face approach to education as typically featured in SLACs Before we in the United States abandon or compromise our commitment to the liberal arts oddly enough precisely at a time when our global competitors are discovering emulating and founding American style SLACs and new liberal arts programs we need a wake up call namely to the fact that the nation's SLACs provide a time tested model of educational integrity and success

Impacts and Outcomes of Global University Rankings Kayyali, Mustafa, 2025-10-15. Global university rankings shape higher education policies, institutional strategies, and student experiences worldwide. These rankings measure and compare universities based on indicators like research output, academic reputation, and faculty qualifications. While rankings can enhance transparency and promote healthy competition, they also generate consequences. High rankings can attract funding, top faculty, and international students. Meanwhile, the pressure may lead institutions to prioritize metrics, potentially decreasing teaching quality, social impact, and equity. As their influence grows, it becomes important to examine the real impacts and outcomes of global university rankings on higher education systems. *Impacts and Outcomes of Global University Rankings* explores how global university rankings influence institutional behavior, resource allocation, and policy decisions within higher education. It examines the outcomes of these rankings, including their effects on academic priorities, equity, and the student experience across different regions and institutions. This book covers topics such as academic reputation, internationalization, and education quality and is a useful resource for educators, policymakers, government officials, academicians, researchers, and scientists.

The Impact of Higher Education Ranking Systems on Universities Kevin Downing, Petrus Johannes Looock, Sarah Gravett, 2021-04-05. This book, written by three generations of rankings academics with considerable experience from three very different regions of the globe, lifts the lid on the real impact of higher education ranking systems (HERS) on universities and their stakeholders. It critically analyses the criteria that make up the Big Three global ranking systems and, using interviews with senior administrators, academics, and managers, discusses their impact on universities from four very different continents. Higher education continues to be dominated by a reputational hierarchy of institutions that sustains and is reinforced by HERS. Despite all the opinions and arguments about the legitimacy of the rankings as a construct, it seems experts agree that they are here to stay. The question therefore seems to be less about whether or not universities should be compared and ranked, but the manner in which this is undertaken. Delivering a fresh perspective on global rankings, this book summarizes the development of HERS and provides a critical evaluation of the effects of HERS on four different major regions: South Africa, the Arab region, South East Asia, and Australia. It will appeal to any academic, student, university administrator, or governing body interested in or affected by global higher education ranking systems.

Today's Universities: Combining Rigour with Relevance Michigan State University, 2015-08-05. Last year, the Dubai International Conference in Higher Education considered the global challenge of sustaining success in higher education. This year, we posed the question: How do universities combine rigour with relevance? Once again, we have invited all those involved in the higher education community to come together to share insights related to the provision of education that is rigorous and at the same time relevant. The

three key premises of the conference are these 1 Higher education institutions must demonstrate their relevance to the needs of the workforce in a landscape of constant and rapid economic and social change 2 They must maintain the rigorous academic standards that are the hallmark of a quality institution 3 With the accelerating power and reach of the web universities must meet unprecedented challenges as technological innovation disrupts their traditional business model Unless individual universities prove that they are capable of adapting successfully in the face of these three pressures their futures may be uncertain

outcomes financial transparency and the value of a college degree As the cost of tuition is on the rise and student debt growing the concerns on equitability and the concerns of student engagement have left many in the public to lose trust in higher education From government regulations to accreditation standards and data driven assessment models accountability measures are evolving to ensure that higher education remains both effective and accessible As the public become more distrustful of higher education discussing the problems issues is effective in seeking change Accountability in Higher Education Navigating Current Issues and Trends explores the current trends and issues with accountability in higher education It discusses how accountability in higher education is essential and is the most impactful This book covers topics such as accountability diversity and inclusion and educational training and is a useful resource higher education professionals who seek to know more about navigating the landscape of accountability in higher education **The Best 117 Law Schools** Eric Owens, Princeton Review (Firm), 2004 Our Best 357 Colleges is the best selling college guide on the market because it is the voice of the students Now we let graduate students speak for themselves too in these brand new guides for selecting the ideal business law medical or arts and humanities graduate school It includes detailed profiles rankings based on student surveys like those made popular by our Best 357 Colleges guide as well as student quotes about classes professors the social scene and more Plus we cover the ins and outs of admissions and financial aid Each guide also includes an index of all schools with the most pertinent facts such as contact information And we've topped it all off with our school says section where participating schools can talk back by providing their own profiles It's a whole new way to find the perfect match in a graduate school **Paying for College Without Going Broke, 2005 Edition** Princeton Review (Firm), 2004-10-12 Paying for College Without Going Broke takes the stress confusion and guess work out of applying for financial aid Students and their parents learn how to calculate their aid eligibility before applying to college and plan ahead to improve their chances of receiving aid Parents and students will learn to negotiate with financial aid offices handle special circumstances for single parents or independent students and receive educational tax breaks Paying for College Without Going Broke is the only book to include both the FAFSA and the CSS PROFILE to make things even easier for students and parents *Are You Smart Enough?* Alexander W. Astin, 2023-07-03 This book explores the many ways in which the obsession with being smart distorts the life of a typical college or university and how this obsession leads to a higher education that shortchanges the majority of students and by extension our society's need for an educated population The author calls on his colleagues in higher education to return the focus to the true mission of developing the potential of each student However smart they are when they get to college both the student and the college should be able to show what they learned while there Unfortunately colleges and universities have embraced two very narrow definitions of smartness the course grade and especially the standardized test A large body of research shows that it will be very difficult for colleges to fulfill their stated mission unless they substantially broaden their conception to include student qualities such as leadership social

responsibility honesty empathy and citizenship Specifically the book grapples with issues such as the following Why America's 3 000 plus colleges and universities have evolved into a hierarchical pecking order where institutions compete with each other to recruit smart students and where a handful of elite institutions at the top of the pecking order enroll the smartest students Why higher education favors its smartest students to the point where the not so smart students get second class treatment Why so many colleges find it difficult to make good on their commitment to affirmative action and equality of opportunity Why college faculties tend to value being smart more than developing students smartness i e teaching and learning
