Energy Law and the Sustainable Company Patricia Park, Duncan Magnus Park, 2016-04-28 What kind of decision making should multinationals engage in to create a sustainable company There is substantial debate over why CEOs senior management and Boards of Directors make the wrong decisions by not asking the right questions with the result that not only is the company itself damaged but all of the stakeholders find themselves at a detriment Focusing on innovation technology transfer and the use of intangible assets Energy Law and the Sustainable Company features case studies from the oil and gas sector to illustrate how to develop a sustainable business Considering corporate social responsibility from the perspective of international and national law the book demonstrates how companies

can be both profitable and ethical using the influences of psychology to encourage senior decision makers to make the right decisions It was revealed that reputation was the main principle influencing decision making The book also discusses how companies have reported on their sustainability strategy and considers how technology transfer and intangible assets may play a part in addressing global sustainability This book should be invaluable reading to students and scholars of Sustainable Business Business Law Corporate Social Responsibility Environmental and Energy Law as well as Environmental and Energy Management

Multinational Enterprises and the Law Peter Muchlinski, 2007 This text analyses the major regulatory areas relating to multinational enterprises It covers the main economic law issues relating to jurisdiction entry and establishment controls and liberalisation tax company law competition and technology transfer It also deals with the increasingly prominent demands for corporate social responsibility covering labour rights human rights and the environment and the recent developments in arbitral decisions that give increased importance to the protection standards contained in international investment protection agreements Source inconnue

Legal treatment standards for international investments. Heuristic aspects Cristina-Elena Popa Tache, 2021-06-18 Discussing the standards of legal treatment for international investment means subjecting the law branch in its entirety to research Representing the most comprehensive part of particular importance for international investment law treatment standards continue to generate a series of differentiations whose understanding and approach often require the analysis of the starting points that led to the emergence by division of this branch of law International investment treatment standards represent or should represent the direct effect of the principles of international investment law thus being their expression with a pronounced logical affinity between them Specifically they are not confused with the principles but they are the practical reflection at the level of rights and obligations applicable to the performers in this field in the highlight of the theoretical practical aspect having a customary origin as well as the principles underlying their development Following this logic and analyzing the situation of the latest investment treaties it turns out that there is an insufficiency in the preponderance of treatment standards compared to the principles much more numerous and constantly expanding of this field of law The specificity of this branch of law consists in the emphasis on its fundamental concepts essentializing what determines the whole being considered as a science of essentialization and ultimately the role of any method of scientific research is to analyze discover and highlight what this branch of law represents as a whole what determines it the connections of this ensemble with other sciences the composition and structuring of the system and the substantiation of the connections between its components The standards of legal treatment of international investments settled with the individualization of international investment law Their appearance took place gradually depending on the path marked by the stages of emergence and evolution of the legal regime of foreign investment from the legal phenomenon to the branch of law from trade in general to foreign investment in particular In all of this legal scientific research plays a key role because any codification activity must be scientifically substantiated Any

codification policy must ensure a balance between the diachrony and the synchrony of international investment law between the dynamics and the statics of this law A complete analysis of the treatment standards of international investments can be performed only by a close correlation because the singular existence of a standard specific to this field is excluded from the start The importance of establishing and existence of eloquent and integrated treatment standards is a condition for survival under international economic crises The main feature of this monograph is to present the subject in a way that is as easy to understand as possible to study and apply such rules being a very useful and valuable material for students masters doctoral students theoreticians and practitioners **Gender, Law and Justice in a Global Market** Ann Stewart,2011-08-25

Theories of gender justice in the twenty first century must engage with global economic and social processes Using concepts from economic analysis associated with global commodity chains and feminist ethics of care Ann Stewart considers the way in which gender contracts relating to work and care contribute to gender inequalities worldwide She explores how economies in the global north stimulate desires and create deficits in care and belonging which are met through transnational movements and traces the way in which transnational economic processes discourses of rights and care create relationships between global south and north African women produce fruit and flowers for European consumption body workers migrate to meet deficits in affect through provision of care and sex British Asian families seek belonging through transnational marriages The Routledge Handbook of Environmental Justice Ryan Holifield,Jayajit Chakraborty,Gordon

Walker,2017-09-14 The Routledge Handbook of Environmental Justice presents an extensive and cutting edge introduction to the diverse rapidly growing body of research on pressing issues of environmental justice and injustice With wide ranging discussion of current debates controversies and questions in the history theory and methods of environmental justice research contributed by over 90 leading social scientists natural scientists humanists and scholars from professional disciplines from six continents it is an essential resource both for newcomers to this research and for experienced scholars and practitioners The chapters of this volume examine the roots of environmental justice activism lay out and assess key theories and approaches and consider the many different substantive issues that have been the subject of activism empirical research and policy development throughout the world The Handbook features critical reviews of quantitative qualitative and mixed methodological approaches and explicitly addresses interdisciplinarity transdisciplinarity and engaged research Instead of adopting a narrow regional focus it tackles substantive issues and presents perspectives from political and cultural systems across the world as well as addressing activism for environmental justice at the global scale Its chapters do not simply review the state of the art but also propose new conceptual frameworks and directions for research policy and practice Providing detailed but accessible overviews of the complex varied dimensions of environmental justice and injustice the Handbook is an essential guide and reference not only for researchers engaged with environmental justice but also for undergraduate and graduate teaching and for policymakers and activists *Sustainable Ocean Resource Governance*

Foreign Investment in the Sultanate of Oman Moosa Salim Jabir Al Azri, 2021-10-11 No detailed description available for Foreign Investment in the Sultanate of Oman **Law in the Pursuit of Development** Amanda Perry Kessaris, 2009-12-16 Law in the Pursuit of Development critically explores the relationships between contemporary principles and practice in law and development Including papers by internationally renowned as well as emerging scholars and practitioners the book is organized around the three liberal principles which underlie current efforts to direct law towards the pursuit of development First that the private sector has an important role to play in promoting the public interest second that widespread participation and accountability are essential to any large scale enterprise and third that the rule of law is a fundamental building block of development This insightful and provocative collection in which contributors critique both the principles and efforts to implement them in practice will be of considerable interest to students academics and practitioners with an interest in the fields of law and development international economic law and law and globalization Global Civil Society in International Lawmaking and Global Governance Barbara Woodward, 2010-05-17 International law scholarship has

not adequately recognised the magnitude of the role of global civil society in global governance and international lawmaking Building upon theoretical historical and legal scholarship and presenting studies of GCS actor practice in a wide range of lawmaking processes including treaty making conferences international organisations and adjudicatory mechanisms this book convincingly demonstrates that GCS actors have created and influenced the creation of norms of binding public international law and influential non binding soft or non law It presents a compelling case that calls for augmenting GCS access to information participation in legal decision making processes for those likely to be affected and access justice thereby enhancing the legitimacy of public international law **European Corporate Law** Adriaan F.M.

Global Values and International Trade Law Csongor István Nagy, 2021-12-26 Exploring the relationship and interaction between economic interests and normative non trade values this book argues that the emergence and development of non trade values is based on a complex dialectic interaction between selfish economic interests and normative values and examines how their structural interdependence has given rise to a remarkable evolution in international trade Conceiving this relationship as an intricate dialectic one that is neither purely value driven nor purely economic interest driven it addresses the emergence function and role of non trade values in international trade with a synthesizing approach and explores the results of their interaction in international economic intercourse Approaching the non trade issues of trade in a holistic manner the book demonstrates that trade can operate smoothly only if it is framed by an architecture of normative value standards and international trade liberalization has reached the level where further development calls for cooperation also in fields that at first glance may appear to be non trade in nature
