Sif Biology Ol Tb ,2007 **Does an electron have a structure?** Åke Hedberg,2017-11-06 The superficial philosophy that believes that the electron lacks content and thus structure and thus is punctual has its roots that can be traced back hundred years as the author sees it Then founded the positivist philosophy we find in today s physics and other natural sciences The contents will be destroyed in Heisenberg s and Bohr s philosophy the so called Copenhagen interpretation where the statistical data and mathematical formulas is all we can lean on A philosophy Albert Einstein stubbornly criticized

his entire life as we know Only fuzzy statistics that God plays dice he meant This is often the content of any criticism of the Copenhagen interpretation and it was his The belief that quantum mechanics is the final truth is a major obstacle to scientific development Therefore Einstein could not convince Bohr and others with his criticism There were also some important puzzles missing for this at this time More sophisticated instruments were required than were available 80 90 years ago Therefore it took a long time in the 1980s before an advanced chaos theory could be established But the established truth about the perfect quantum mechanics prevented an integration with new discoveries and theories Thus one has not realized that nature was and is organized not only in the mechanical way that quantum mechanics and wave mechanics and so on assume What chaos theory using fast computers so graphically and vividly could show It is thus no coincidence that physics deals with punctual mechanical objects but is a consequence of a world view an ideology In fact there is nothing in this world that does not have a structure How Technology Is Changing Human Behavior C.G. Prado,2019-04-18 Explains some of the ways in which technological advances are altering for better or worse large scale human behavior thought processes and critical thinking skills Recent technological advances from dating apps to artificial insemination from smart phones to portable computers that can instantly search the World Wide Web for information and from robots performing surgery to cars driving themselves once remarkable have become an unremarkable part of our lives The team of authors of this book asks How are they changing us We all recognize that these innovations have altered our lives often making them easier but it is also important to ask if we have lost anything while we have gained from them The authors of How Technology Is Changing Human Behavior Issues and Benefits show that human behaviors and thinking skills are rapidly being reprogrammed by technology with even more developments on the horizon sure to further alter our future and shape our identity **Sif**
