The Routledge Companion to Music Technology and Education is a comprehensive resource that draws together burgeoning research on the use of technology in music education around the world. The 37 chapters in this volume consider the major aspects of the use of technology in music education.

Part I: Contexts Examines the historical and philosophical contexts of technology in music. This section addresses themes such as special education, cognition, experimentation, audience engagement, gender, and information and communication technologies.

Part II: Real Worlds Discusses real-world scenarios that relate to music technology and education. Topics such as computers, composition, performance, and the curriculum are covered here.

Part III: Virtual Worlds Explores the virtual world of learning through our understanding of media, video games, and online collaboration.

Part IV: Developing and Supporting Musicianship Highlights the framework for providing support and development for teachers using technology to understand and develop musical understanding.

The Music Practitioner Jane W. Davidson, 2017-07-05. Useful work has been done in recent years in the areas of music psychology, philosophy, and education, yet this is the first book to provide a wide assessment of what practical benefits this research can bring to the music practitioner. With 25 chapters by writers representing a broad range of perspectives, this volume is able to highlight many of the potential links between music research and practice. The chapters are divided into five main sections.

Section one examines practitioners' use of research to assist their practice and the ways in which they might train to become systematic researchers.

Section two explores research centred on perception and cognition, while **section three** looks at how practitioners have explored their everyday work and what this reveals about the creative process.

Section four focuses on how being a musician affects an individual's sense of self and how others perceive him or her. The essays in **section five** outline the

new types of data that creative researchers can provide for analysis and interpretation The concluding chapter discusses that key question what makes music affect us in the way it does The research findings in each chapter provide useful sources of data and raise questions that are applicable across the spectrum of music related disciplines Moreover the research methodologies applied to a specific question may have broader application for readers wishing to take on research themselves

Philosophy and Psychology of Time Bruno Mölder, Valtteri Arstila, Peter Øhrstrøm, 2015-11-02 This book is an edited collection of papers from international experts in philosophy and psychology concerned with time The collection aims to bridge the gap between these disciplines by focussing on five key themes and providing philosophical and psychological perspectives on each theme The first theme is the concept of time The discussion ranges from the folk concept of time to the notion of time in logic philosophy and psychology The second theme concerns the notion of present in the philosophy of mind metaphysics and psychology The third theme relates to continuity and flow of time in mind One of the key questions in this section is how the apparent temporal continuity of conscious experience relates to the possibly discrete character of underlying neural processes The fourth theme is the timing of experiences with a focus on the perception of simultaneity and illusions of temporal order Such effects are treated as test cases for hypotheses about the relationship between the subjective temporal order of experience and the objective order of neural events The fifth and the final theme of the volume is time and intersubjectivity This section examines the role of time in interpersonal coordination and in the development of social skills The collection will appeal to both psychologists and philosophers but also to researchers from other disciplines who seek an accessible overview of the research on time in psychology and philosophy
