MOTO HELMETS

PROPER FIT

To find your approximate size use a soft tape measure. Start at your forehead approximately one inch above your eyebrows and across the largest portion of the back of your head. Cross reference this measurement on the helmet size chart to determine the approximate size.

If you do not have a soft measuring tape, use a string or phone charging cord in the same way. Then lay it down and measure with a ruler.

Sheinbaum was sworn in as Mexico's 66th president and its first female leader. Political analysts focused their research on the potential impact of her presidency on the advancement of social transformation and the deepening of gender equality. Featuring chapters from highly respected researchers whose work has been critical to promoting gender parity in Mexico, *Women as Constructors of Parity Democracy in Mexico* chronicles the evolution of women's integration into Mexico's public sphere during the nation's democratic transition, scrutinizing the tangible impacts of women's political representation within the initial years of the parity model while dissecting the political currents that either advanced or impeded the women's agenda. The book is divided into three parts and consists of nine chapters that follow a common framework highlighting how women politicians and activists operate within the legislative and executive branches to bring about change in the field of gender politics. *Women as Builders of Parity Democracy in Mexico* will be of interest to researchers and postgraduates studying gender and politics in Mexico.

Epidemic Disease in Mexico City, 1761-1813 Donald B. Cooper, 2015-01-20

Five deadly epidemics chiefly typhus and smallpox struck Mexico City in the years between 1761 and 1813, claiming a minimum of fifty thousand lives. Mexico City was at that time the major metropolis of the New World and the capital of New Spain, by far the richest and most sophisticated city in that vast empire. It had the best medicines, the best doctors, and the best hospitals of the New World. What caused these devastating epidemics? Donald B. Cooper here makes a thorough study of the problem. Based almost entirely on unpublished manuscript materials from the national archives of Mexico and the municipal archives of Mexico City, his work represents the first detailed study of the impact of epidemic disease on the history of New Spain, primarily of its capital. The course of each epidemic, its inclusive dates, the mortality it caused, and its effect upon the community are fully described. At the time a major epidemic was in progress, the author says, all levels of government, national and local, secular and ecclesiastical, became involved in varying degrees in providing resources and leadership. The Church, wealthy corporations, and private citizens contributed the main funds. During the actual time of crisis, an outbreak could be prosecuted with remarkable success and cooperation. Once an epidemic was over, however, little was done to prevent another. No single person or agency in Mexico City was sufficiently cognizant of the diverse problems involved to cope with them within a national or regional range, not even the viceroy. Such vital public works as aqueducts, waterlines, roads, and canals were inadequately maintained. Such essential municipal services as cleaning streets and canals, collecting garbage and refuse, and caring for the muddy, shallow cemeteries were poor, if not nonexistent. Government officials, as well as the populace, were insufficiently concerned with the relation between sanitation and disease. The practice of medicine in eighteenth-century Mexico had few scientific or professional aspects. The close relation of medicine and theology tended to inhibit experimentation that might have effectively broadened the frontiers of medical knowledge. Traditionalism acted as a barrier to the adoption of innovations. In the epidemic of 1779, for instance, inoculation, which could have saved innumerable lives, was totally rejected. In the outbreak of 1797, it was accepted only by the small upper class when vaccination
