Warranty and Preventive Maintenance for Remanufactured Products Ammar Y. Alqahtani, Surendra M. Gupta, 2018-12-12

The exponential increase in the development of technology coupled with the customers immense desire to possess the newest technological products makes for truncated product lifespans which instigates a substantial upsurge in their rate of disposal Attempts have been made to establish specialized product recovery facilities with the intention of diminishing the volume of accumulated waste delivered to landfills using product recovery procedure such as remanufacturing The economic benefits produced by remanufacturing also portray the role of product recovery in a more attractive light The quality of a remanufactured product is uncertain for some consumers Therefore these consumers possess insecurities in deciding whether or not the remanufactured products will render the same expected performance This ambiguity regarding a remanufactured product could possibly result in the consumer deciding against its purchase With such consumer apprehension remanufacturers often seek market mechanisms that provide reassurance as to the stable durability that these products still maintain One strategy that the remanufacturers often use is the utilization of the premise of offering product warranties with preventive maintenance on their products This book is concerned with the practice and theory of warranty management and preventive maintenance particularly in relation to remanufactured products warranties Models developed in this book can be used for making the right decisions in offering renewable nonrenewable one and two dimensional warranty policies and for managerial decision in considering maintenance contracts or outsourcing maintenance for remanufactured components and products Features Discusses a variety of warranty policies and preventive maintenance of remanufactured products first book to do so Presents mathematical models and applications for warranty policies using examples and simulation results Considers cost and optimization problems from the remanufacturer s and buyer s points of views Provides a foundation for academicians interested in building models in the area of warranty and preventive maintenance analysis of remanufactured products Offers the essential methodology needed by practitioners involved with warranty and preventive maintenance analysis along with extensive references for further research

Philosophy of Pseudoscience Massimo Pigliucci, Maarten Boudry,2022-12-22 A remarkable contribution to one of the most vexing problems in science the demarcation problem or how to distinguish science from nonscience Francisco J Ayala author of Darwin's Gift to Science and Religion What sets the practice of rigorously tested sound science apart from pseudoscience In this volume the contributors seek to answer this question known to philosophers of science as the

demarcation problem This issue has a long history in philosophy stretching as far back as the early twentieth century and the work of Karl Popper But by the late 1980s scholars in the field began to treat the demarcation problem as impossible to solve and futile to ponder However the essays that Massimo Pigliucci and Maarten Boudry have assembled in this volume make a rousing case for the unequivocal importance of reflecting on the separation between pseudoscience and sound science Moreover the demarcation problem is not a purely theoretical dilemma of mere academic interest it affects parents decisions to vaccinate children and governments willingness to adopt policies that prevent climate change Pseudoscience often mimics science using the superficial language and trappings of actual scientific research to seem more respectable Even a well informed public can be taken in by such questionable theories dressed up as science Pseudoscientific beliefs compete with sound science on the health pages of newspapers for media coverage and in laboratories for research funding Now more than ever the ability to separate genuine scientific findings from spurious ones is vital and *The Philosophy of Pseudoscience* provides ground for philosophers sociologists historians and laypeople to make decisions about what science is or isn't A manual to overcome our natural cognitive biases Corriere della Sera Italy *Interior, Environment, and Related Agencies Appropriations for 2011, Part 1B, 111-2 Hearings*, 2010 *Farmers' Review*, 1892 **Interior, Environment, and Related Agencies Appropriations for 2011** United States.
