Groundbreaking Scientific Experiments, Inventions, and Discoveries of the Middle Ages and the Renaissance Robert E. Krebs, 2004-03-30 The Middle Ages and the Renaissance were a period of scientific and literary reawakening Scientific development and a renewed interest in classical science led to new discoveries inventions and technologies Between 500 and 1600 A D scientific explorers rediscovered ancient Greek and Eastern knowledge which led to an eruption of fresh ideas This reference work describes more than 75 experiments inventions and discoveries of the period as well as the scientists physicians and scholars responsible for them Individuals such as Leonardo da Vinci Marco Polo and Galileo are included along with entries on reconstructive surgery Stonehenge eyeglasses the microscope and the discovery of smallpox Part of a unique series that ranges from ancient times to the 20th century this exploration of scientific advancements during the Middle Ages and the Renaissance will be useful to high school and college students teachers and general readers seeking information about significant advances in scientific history

The Eternal Return Roth, Wolf M, Lee, Yew-Jin, Boyer, Leanna, 2008 Cultural historical activity theory frequently is used as a framework for studying static situations statically In this book the authors implement Lev Vygotsky s call for doing unit rather than element analysis by studying activity dynamically across different spatial and temporal scales The eternal return that is the continual production of change while reproducing the system is taken as the central metaphor for a system that produces self movement A case study is provided of salmon enhancement in British Columbia Canada linking the 120 year cultural history of this activity with the 30 year evolution of a fish hatchery that concretely constitutes the system in one of the possible ways and the knowing and learning of individual fish culturists which is analyzed at the time scales of five years down to the micro evolution of individual conversations Most importantly the authors implement Vygotsky s call for theorizing affect and emotion at the very heart of the activity system showing how the eternal return allows us to under stand the change of worker involvement and identification with the goals of their workplace

Assessment of Planetary Protection Requirements for Mars Sample Return Missions National Research Council, Division on Engineering and Physical Sciences, Space Studies Board, Committee on the Review of Planetary Protection Requirements for Mars Sample Return Missions, 2009-06-06 NASA maintains a planetary protection policy to avoid the forward biological contamination of other worlds by terrestrial organisms and back biological contamination of Earth

from the return of extraterrestrial materials by spaceflight missions Forward contamination issues related to Mars missions were addressed in a 2006 National Research Council NRC book Preventing the Forward Contamination of Mars However it has been more than 10 years since back contamination issues were last examined Driven by a renewed interest in Mars sample return missions this book reviews updates and replaces the planetary protection conclusions and recommendations contained in the NRC's 1997 report Mars Sample Return Issues and Recommendations The specific issues addressed in this book include the following The potential for living entities to be included in samples returned from Mars Scientific investigations that should be conducted to reduce uncertainty in the above assessment The potential for large scale effects on Earth's environment by any returned entity released to the environment Criteria for intentional sample release taking note of current and anticipated regulatory frameworks and The status of technological measures that could be taken on a mission to prevent the inadvertent release of a returned sample into Earth's biosphere

Microsoft Word Simple Projects, Grades 4-6 Mindy Pines, 2000-03 *Lost History of an Unwanted Future* J.M. Segura, 2025-11-03 In the super overpopulated world of twenty ninth century the remnants of civilizations cling to survival in fortified city states Among them is Iulius a historian and a member of a secret society entrusted with a daunting mission to chronicle the key events that led to civilization's collapse He hopes this history might guide future generations or perhaps extraterrestrial visitors as they seek to understand the reasons for humanity's tragic fall One day Iulius receives a long awaited coded message indicating it's time to leave the safety of city state New Vancouver and deliver his manuscript to whoever and whenever his mentor Father Thomas says Once there he will also receive a hyper memory stick containing the accumulated knowledge of humankind that he must deliver to that person to that destination But the journey ahead is fraught with danger Beyond the city's walls lies a devastated wilderness teeming with billions of desperate feral survivors who have abandoned their humanity for the sake of a single goal survival Aided by an unlikely group of companions Iulius must navigate treacherous terrain evade bloodthirsty marauders and confront his own fears all while racing to complete his chronicle before he too becomes just another casualty of the apocalyptic wasteland

Vision and Voyages for Planetary Science in the Decade 2013-2022 National Research Council, Division on

Engineering and Physical Sciences, Space Studies Board, Committee on the Planetary Science Decadal Survey, 2012-01-30 In recent years planetary science has seen a tremendous growth in new knowledge Deposits of water ice exist at the Moon's poles Discoveries on the surface of Mars point to an early warm wet climate and perhaps conditions under which life could have emerged Liquid methane rain falls on Saturn's moon Titan creating rivers lakes and geologic landscapes with uncanny resemblances to Earth's Vision and Voyages for Planetary Science in the Decade 2013-2022 surveys the current state of knowledge of the solar system and recommends a suite of planetary science flagship missions for the decade 2013-2022 that could provide a steady stream of important new discoveries about the solar system Research priorities defined in the report were selected through a rigorous review that included input from five expert panels NASA's highest priority large mission should be the Mars Astrobiology Explorer-Cacher (MAX-C) a mission to Mars that could help determine whether the planet ever supported life and could also help answer questions about its geologic and climatic history Other projects should include a mission to Jupiter's icy moon Europa and its subsurface ocean and the Uranus Orbiter and Probe mission to investigate that planet's interior structure atmosphere and composition For medium size missions Vision and Voyages for Planetary Science in the Decade 2013-2022 recommends that NASA select two new missions to be included in its New Frontiers program which explores the solar system with frequent mid-size spacecraft missions If NASA cannot stay within budget for any of these proposed flagship projects it should focus on smaller less expensive missions first Vision and Voyages for Planetary Science in the Decade 2013-2022 suggests that the National Science Foundation expand its funding for existing laboratories and establish new facilities as needed It also recommends that the program enlist the participation of international partners This report is a vital resource for government agencies supporting space science the planetary science community and the public

The Rebirth of the Russian Space Program Brian Harvey, 2007-05-10 This fifty years after Sputnik is the definitive book on the Russian space program The author covers all the key elements of the current Russian space program including both manned and unmanned missions He examines the various types of unmanned applications programs as well as the crucial military program and even analyzes the infrastructure of production launch centres and tracking You'll also find discussion of the commercialization of the program and its relationship with western companies Russia's current space experiment is also put in a comparative global context Strong emphasis is placed on Russia's future space intentions and on new programs and missions in prospect

Returning People to the Moon After Apollo Pat Norris, 2019-06-04 July 2019 marks 50 years since Neil Armstrong took his famous first steps on the surface of the Moon As people around the world celebrate the anniversary of this great American achievement they might wonder why there have been no further human missions to the Moon since Apollo 17 in 1972 This book assesses the legacy of the Apollo missions based on several decades of space developments since the program's end The question of why we haven't sent humans back to the Moon is explored through a multidisciplinary lens that weaves together technological and historical perspectives The nine manned Apollo missions including the six that

landed on the Moon are described here by an author who has 50 years of experience in the space industry and whose work spanned the Apollo 8-13 missions. The final section of the book provides a comprehensive assessment of today's programs and current plans for sending humans to the Moon. *Scientific and Technical Aerospace Reports*, 1994. Returning to Scientific Practice Xu Zhu, Wu Tong, 2019-05-17. This book is a result from a collective study on philosophy of scientific practice (PSP) which began around 2002 and is still ongoing. There is an apparently increasing interest in scientific practice influenced by the historicistic philosophy of science and the sociology of scientific knowledge (SSK). Prof. WU Tong and his research group believe that it is necessary for PSP to turn from the theory-dominant position to the practice-dominance. PSP has also put forward the possibility of reinterpreting the epistemic status of local knowledge in Chinese tradition which provides the most significant motivation to participate in this study. In this book, we have selected three main cases: namely Chinese medicine, Fengshui, and Ethnobotany, to examine the effect of PSP. The aim of our collective study is not merely on the theoretical construction of PSP but also to consider the various applications of PSP, especially for reinterpreting and demonstrating the variety of local knowledge from traditional China, which seems to be a genuine contribution to the international enterprise of philosophy of science, particularly made by Chinese scholars. **Where No Man Has Gone Before** William D. Compton, 1996-12. **Where No Man Has Gone Before** William David Compton, 1989. **Spies in the Sky** Pat Norris, 2008. In this book, Patrick Norris responds to the 50th Anniversary of the dawn of the Space Age: the launch of Sputnik 1, with a review of the most important historical applications of space science for the benefit of the human race during that half-century, focusing on the prevention of nuclear war. In developing this story, Norris illuminates a little-known aspect of the Space Age: namely, the military dimension. **Popular Science**, 1963-04. Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.
