In almost all principled accounts of questions questions are related to the corresponding answers Zellig Harris Harris 1978 1 for example maintains that all interrogative sentences can be derived by means of the independently established transformations of the language from sentences which assert that someone is asking about a disjunction of statements which are the relevant possible answers to that interrogative This amounts to the claim that a yes no question such as Will John stay is derived from I ask you whether John will stay and a wh question such as Who came is derived from something like I ask you whether A came or B came or or X came Though in generative grammar interrogatives are not derived from the corresponding declaratives the semantic interpretation of questions is akin to the syntactic source of questions posited by Harris Jerrold J Katz and Paul M Postal Katz Postal 1964 113 117 state a reading rule for Q the interrogative constituent which boils down to 1 in the case of yes no questions and to 2 in the case of wh questions 1 Tell me which of the following is true John will stay or John will not stay 2 Tell me which of the following is true A came or B came or or X came Thus the semantic interpretation of questions makes reference to the set of possible answers represented here by a disjunction of statements

The Question of Linguistic Idealism ,2025-02-24 The chapters in this volume address the question to what extent the doctrine of linguistic idealism is coherent and plausible Linguistic idealism as defined here holds that both the existence and the very general structure of the world are in some sense dependent on the existence and the structure of language The interest of the thesis is that since human language is an evolved empirical phenomenon it would be surprising and significant if the world which existed long before human beings came into being and is in many respects quite obviously independent of them were somehow beholden to the fact that human beings can talk about it That nevertheless is the claim Much of the discussion of linguistic idealism revolves around making the definition of it both precise and interesting whether for purposes of attack or defence The Question of Linguistic Idealism opens with an introduction that presents a general argument for linguistic idealism and examines the way in which that position figures in the writings of Ludwig Wittgenstein and Elizabeth Anscombe The authors in this collection cover a wide range of possible approaches to linguistic idealism Some support the position in one version or another others are hostile All the contributions are both historically aware and engaged with systematic considerations but in some the emphasis is placed on historical aspects of the problem here the focus is particularly on the writings of Kant and Wittgenstein whereas others adopt a more systematic approach Each philosopher addresses their chosen aspect of the general topic in broadly speaking metaphysical terms but the bearing of modern linguistic theory on the thesis of linguistic idealism as well as its connections with mathematical results and practice play a role in some of the contributions as well
