Mediterranean Mobilities
Maria Paradiso, 2018-05-31

This book critically assesses mobilities across the Mediterranean Basin and explores the implications of changing European relationships in the light of observations of the intersectional formation and evolution of identities, behavior and ideas. Further, it discusses the timely topic of a new diversity of migration and mobility practices, personal and virtual mobilities in terms of gender, motivations, emotional geographies, impacts and circulation from conceptual and empirical perspectives, providing new insights for scholars and policy makers in the context of urgently needed national and European policies. *Mediterranean Mobilities* is based on fieldwork in European and non-European countries and on mutual learning and transfer of knowledge among scholars from nine universities in Morocco, Algeria, Israel, Ireland, Italy, Portugal and Spain, as well as stakeholders in Europe and North Africa. The results stem from the FP7 Marie Curie IRSES project MEDCHANGe coordinated by the book editor. The project comprises fieldwork conducted by distinguished scholars in Europe, Morocco, Algeria and Israel, generating original data and findings on fast-changing realities. This book appeals to researchers but also serves as a basic or complementary text in advanced undergraduate, graduate or master's courses on mobilities, migration, regionalization, cooperation, international relations and Mediterranean studies as part of teaching programs in geography, sociology, international political sciences, as well as programs focusing on regional studies, e.g. European integration. It is also of interest to the professional and institutional community in the wide area of Mediterranean politics, economy and society, as well as a general readership.
