Vermessung der Musikpädagogik

Eva Meidel, Silke Kruse-Weber, Bernd Clausen, Alexander J. Cvetko, Martina Krause-Benz, 2023 Am 11. Juli 2023 feiert Stefan H. Rmann, Inhaber des Lehrstuhls für Musikpädagogik und Musikdidaktik an der Otto-Friedrich-Universität Bamberg, seinen 60. Geburtstag. Es ist gute akademische Tradition zu diesem Anlass dem Jubilar eine Festgabe zu widmen. Seinen Einsatz für eine wissenschaftliche Musikpädagogik, die sich selbst in reflektierender Haltung gegenbertritt, würdigt die vorliegende Festschrift unter dem Titel *Vermessung der Musikpädagogik*. Stefan H. Rmanns besonderes Forschungsinteresse an historischen und systematischen Fragestellungen sowie am fachlichen Selbstverständnis konturiert zentrale Themenschwerpunkte seiner Vita academica. Dazu gehört auch das Bamberger Fachstrukturmodell, das neben anderen wissenschaftlichen Schwerpunkten in dieser Festschrift in den Blick genommen wird. An die fachstrukturelle Auffassung Stefan H. Rmanns anschließend ist der vorliegende Band in drei Rubriken untergliedert. Durch ihre Beiträge machen alle Autorinnen und Autoren ihre hohe Wertschätzung für den Wissenschaftler, Hochschullehrer, Verbandstigen, Förderer und Freund gemeinsam zum Ausdruck bringen und ihm auf diese Weise für sein vielfältiges Wirken danken.

Interactions for Music and Sound Michael Filimowicz, 2022-04-19 *Designing Interactions for Music and Sound* presents multidisciplinary research and case studies in electronic music production, dance, composer collaboration, AI tools for live performance, multimedia works, installations in public spaces, locative media, AR, VR, MR, XR, and health. As the follow-on volume to *Foundations in Sound Design for Interactive Media*, the authors cover key practices, technologies, and concepts such as classifications, design guidelines, and taxonomies of programs, interfaces, sensors, spatialization, and other means for enhancing musical expressivity. Controllerism, i.e., the techniques of non-musician performers of electronic music who utilize MIDI, OSC, and wireless technologies to manipulate sound in real time; artificial intelligence tools used in live club music; soundscape poetics; and research creation based on audio walks, environmental attunement, and embodied listening. New sound design techniques for VR, AR, MR, XR that express virtual human motion and the use of interactive sound in health contexts such as designing sonic interfaces for users with dementia. Collectively, the chapters illustrate the robustness and variety of contemporary interactive sound design research, creativity, and its many applied contexts for students, teachers, researchers, and practitioners. **Tele-Improvisation: Intercultural Interaction in the Online Global Music Jam**

Bown, 2021-02-23 A multidisciplinary introduction to the field of computational creativity analyzing the impact of advanced generative technologies on art and music As algorithms get smarter what role will computers play in the creation of music art and other cultural artifacts Will they be able to create such things from the ground up and will such creations be meaningful In *Beyond the Creative Species* Oliver Bown offers a multidisciplinary examination of computational creativity analyzing the impact of advanced generative technologies on art and music Drawing on a wide range of disciplines including artificial intelligence and machine learning design social theory the psychology of creativity and creative practice research Bown argues that to understand computational creativity we must not only consider what computationally creative algorithms actually do but also examine creative artistic activity itself *Bio A.I. - From Embodied Cognition to Enactive Robotics* Adam Safron, Inês Hipólito, Andy Clark, 2023-12-08 Even before the deep learning revolution the landscape of artificial intelligence AI was already changing drastically in the 90s Embodied intelligence it was proposed must play a crucial role in the design of intelligent machines This new wave was inspired by what is today known as Embodied and Enactive Cognitive Science or E Cognition which considers that cognitive activity does not reduce to the intellectual capacities of agents being able to represent their environments E cognition set AI and robotics in a new direction in which intelligent machines are required to interact with the environment and where this interaction does not reduce to explicit representations or prespecified algorithms These ideas revolutionized the way we think about intelligent machines and cognition but these theoretical advances are only partially reflected in modern approaches to AI and machine learning ML Despite deeply impressive achievements AI ML still struggles to recapitulate the kinds of intelligence we find in natural systems whether we are considering individual insects e g simultaneous localization and mapping or swarm behaviour e g forum sensing and ensemble inferences and especially the kinds of flexibility and high level reasoning characteristic of human cognition *Musical Gestures* Rolf Inge Godøy, Marc Leman, 2010-02-12 *Musical Gestures* is a collection of essays that explore the relationship between sound and movement The book takes an interdisciplinary approach to the fundamental issues of this subject drawing on ideas theories and methods from disciplines such as musicology music perception and human movement science *The Routledge Research Companion to Electronic Music: Reaching out with Technology* Simon Emmerson, 2018-05-16 The theme of this Research Companion is connectivity and the global reach of electroacoustic music and sonic arts made with technology The possible scope of such a companion in the field of electronic music has changed radically over the last 30 years The definitions of the field itself are now broader there is no clear boundary between electronic music and sound art Also what was previously an apparently simple divide between art and popular practices is now not easy or helpful to make and there is a rich cluster of streams of practice with many histories including world music traditions This leads in turn to a steady undermining of a primarily Euro American enterprise in the second half of the twentieth century Telecommunications technology most importantly the development of the internet in the final years of the

century has made materials practices and experiences ubiquitous and apparently universally available though some contributions to this volume reassert the influence and importance of local cultural practice Research in this field is now increasingly multi disciplinary Technological developments are embedded in practices which may be musical social individual and collective The contributors to this companion embrace technological scientific aesthetic historical and social approaches and a host of hybrids but most importantly they try to show how these join up Thus the intention has been to allow a wide variety of new practices to have voice unified through ideas of reaching out and connecting together and in effect showing that there is emerging a different kind of global music
