Music Library And Research Skills:

Music Library and Research Skills Jane Gottlieb, 2006-03 Music Library and Research Skills provides an introductory text designed for courses in music research methodology and librarianship. Written by Jane Gottlieb, Vice President for Library and Information Resources at the Juilliard School and past president of the Music Library Association, the book is designed to introduce students to the basic concepts in how to conduct research in music. This book combines both a basic source list of key reference materials that every music student should know along with specific instruction in how to evaluate and use these resources. Following an introduction giving an overview of the universe of information available on music, the book then traces the research process from choosing a topic to using books from bibliographies to discographies, histories and thematic catalogs and periodicals, web sites, CD-ROM and other information resources. The book concludes by showing the student how to synthesize what the research process has produced into a final paper. In two appendices, the book offers a select glossary of terms for research and non-English language terms commonly found in music research tools. [Music Library and Research Skills](#) Jane Gottlieb, 2017 Concise and engaging, this text covers a wide range of reference sources for research in all genres of music. Through this practical introduction to the key concepts of music research, students will develop a firm understanding of the tools used to gather data, including what types of sources exist, how they are arranged, and how they may best be used to do research.

A Guide to Library Research in Music Pauline Shaw Bayne, Edward Komara, 2020-02-20 A Guide to Library Research in Music introduces students to the process and techniques for researching and writing about music. The book's organization allows for three independent tracks of study. Part 1 treats essentials of the research process, explaining starting point resources such as library catalogs, dictionaries, and bibliographies. It addresses scholarly documentation, the use of style manuals, and basics of copyright. Part 2 develops skills and strategies for library and Internet-based research, describing database structures and library catalogs, subject searching in catalogs and journal indexes, keyword searching techniques, related record searching, and citation databases, and the use of experts and thematic catalogs. Part 3 discusses the organization of a music library, emphasizing score collections, books, and journals in music literature and music teaching publications.
