Decima Flottiglia MAS Walter S. Zapotoczny Jr., 2017-06-25 Previously unpublished accounts of the Italian frogmen force Many previously unpublished photos personal accounts and stories Detailed accounts of ships destroyed and sunk by Decima Flottiglia MASA highly interesting account of a little known force A group of determined human torpedoes motorboat operators and assault swimmers fought bravely for Italy in the Second World War and inspired fear and respect from the British Navy The actions of these men severely reduced British naval power in the Mediterranean Even with small numbers and using relatively limited resources the commandos were a very effective force in the war against the British By the end of

the war these men would sink or disable over 73 000 tons of Allied warships and over 128 000 tons of merchant shipping The story of the Italian commandos is one of determination and bravery Their tactics aroused confusion and nervousness with Allied commanders and their crews Italy's Decima Flottiglia Mas predates both the US Navy Underwater Demolition Teams that were formed in 1943 and forerunners of the better known US Navy SEALs and the British Royal Marines Special Boat Service formed as an offshoot of the Special Air Service in 1941 Perhaps the determination and actions of the Decima Flottiglia Mas qualify them as the best commandos of the Second World War Illustrations 16 black and white photographs

Italian Heavy Cruisers Maurizio Brescia, Augusto de Toro, 2024-01-05 A technical history of seven Italian heavy cruisers Trento Trieste Bolzano Zara Fiume Gorizia Pola a perfect companion volume to Italian Battleships When the Washington Naval Treaty of 1922 effectively banned the building of battleships competition between the major navies concentrated on the next most powerful category heavy cruisers limited to ten thousand tons displacement and eight inch guns Italy followed this trend the first design for what became Trento and Trieste being ordered in 1924 These were the fastest of the first generation Treaty cruisers but were very lightly armored and the succeeding Zara class of four ships were slower but better protected However before the final ship of this class Pola had been completed there was a return to the earlier fast lightly protected concept with the Bolzano although this ship also incorporated aspects of the Zara design The political background design history and technical features of these classes are covered in great depth in this volume They were important ships subject to incremental improvement so no two were identical and model makers will appreciate the space devoted to the variations in appearance using both description and illustration As major units of the Italian battle fleet they were more active than most during the war and their careers are fully detailed including analyses of damage suffered Tragically they were all sunk and the circumstance of each loss is explored As befits a technical history the book is thoroughly illustrated with ship and armament plans detail drawings and color camouflage schemes as well as an outstanding collection of photographs

Mussolini's Army against Greece Richard Carrier, 2021-03-08 This book analyses why the Italian army failed to defeat its Greek opponent between October 1940 and April 1941 It thoroughly examines the multiple forms of ineffectiveness that plagued the political leadership as well as the military organisation Mussolini's aggression of Greece ranks among the most neglected campaigns of the Second World War Initiated on 28 October 1940 the offensive came to a halt less than ten days later by mid November the Greek counter offensive put the Italian armies on the defensive and back in Albania From then on the fatal interaction between failing command structures inadequate weapons and equipment unprepared and unmotivated combatants and terrible logistics lowered to a dangerous level the fighting power of Italian combatants This essay proposes that compared to the North African and Russian campaigns where the Regio Esercito achieved a decent level of military effectiveness the operation against Greece was a military fiasco Only the courage of its soldiers and the German intervention saved the dictator's army from complete disaster This book would appeal to anyone

interested in the history of the world war and to those involved in the study of military effectiveness and intrigued by why armies fail

Confronting Italy M J Pearce,2019-10-31 The hotly contested Mediterranean naval battles of 1940 initiated rapid developments that changed the face of naval warfare yet also had echoes of a previous and less complicated era when gunnery pure and simple dominated warfare at sea The actions were fought when the Royal Navy was still evolving its use of naval air power and when radar at sea was primitive and fitted to only a few ships while Italy s Regia Marina was handicapped by having access to neither Confronting Italy contains three previously classified Naval Staff Histories describing major naval surface actions of 1940 supported by a modern introduction setting them in context and also illustrates warships involved using WW2 US Navy Intelligence Dept documents Confronting Italy is in a series publishing previously classified documents in a new accessible format Plans illustrating the events described have been completely re drawn to include the composition and movements of the Italian actions off Calabria and Cape Spartivento

The Greatest Naval War Ever Fought Vincent O'Hara,2025-10-14 The greatest naval conflict in history occurred during World War II from 1939

to 1945 Most people are familiar with the famous Battle of the Atlantic and epic naval engagements in the Pacific like Midway and Leyte Gulf all of which receive ample coverage in this panoramic work However author Vince O Hara offers a truly global perspective of World War II at sea that captures every aspect of a vast naval conflict that involved dozens of nations more than 15 000 ships and 43 7 million tons of shipping Approximately 570 000 lives were lost at sea in those six years Here the naval action begins in the Baltic Sea before dawn on September 1 1939 when a German battleship opened fire on Polish troops barricaded in a fortress in the port city of Danzig Poland Over the ensuing nine months the conflict spread into Great Britain s home waters of the North Sea the English Channel and the eastern Atlantic One of the most remarkable naval achievements of the war occurred in 1940 during the German invasion of Norway The Kriegsmarine s successful attack in the face of immensely superior Allied naval forces was the war s first large scale amphibious operation As naval activities in Europe expanded into the Mediterranean the war in the Pacific exploded with the Japanese attack on Pearl Harbor in December 1941 That assault led to a series of critical naval battles between Japan and the United States including Wake Island Coral Sea Midway and Guadalcanal O Hara not only deftly examines all the major naval contests in the European and Pacific theaters but also offers detailed analysis of secondary navies such as France Italy and the Soviet Union He explores little known smaller engagements such as the campaigns between Thailand and France or Per and Ecuador O Hara connects this broad range of naval action by focusing on recurring themes of technological innovation command and control logistics and intelligence He demonstrates that there was more than one path to winning sea power and that the most important naval platforms to emerge from the war were the oiler the Landing Ship Tank LST and the Liberty ship not the aircraft carrier the submarine or the battleship O Hara makes clear to readers that the impact of the naval battles won by the Allies still reverberates today

The Eastern Fleet and the Indian Ocean, 1942-1944 Charles Stephenson, 2022-04-06 A study of the British Royal Navy s activities in the Indian Ocean during World War II led by Admiral Sir James Somerville The story of the British Eastern Fleet which operated in the Indian Ocean against Japan has rarely been told Although it was the largest fleet deployed by the Royal Navy prior to 1945 and played a vital part in the theatre it was sent to protect it has no place in the popular consciousness of the naval history of the Second World War So Charles Stephenson s deeply researched and absorbing narrative gives this forgotten fleet the recognition it deserves British pre war naval planning for the Far East is part of the story as is the disastrous loss of the battleship Prince of Wales and battlecruiser Repulse in 1941 but the body of the book focuses on the new fleet commanded by Admiral Sir James Somerville and its operations against the Japanese navy and aircraft as well as Japanese and German submarines Later in the war once the fleet had been reinforced with an American aircraft carrier it was strong enough to take more aggressive actions against the Japanese and these are described in vivid detail Charles Stephenson s authoritative study should appeal to readers who have a special interest in the war with Japan in naval history more generally and Royal Navy in particular Praise for *The Eastern Fleet and the Indian Ocean 1942*

1944 This meticulously researched outstandingly clear well written and absorbing account is long overdue and will most likely become a standard work The text is most helpfully supported by over 80 pages of detailed end notes referenced to each chapter and a detailed index This is not only a book for naval historians but also for anyone with an interest in the War in the Indian Ocean region Highly recommended Military Historical Society I enjoyed this book it gives us an account of an often neglected part of the war at sea and of the achievements of Admiral Somerville who kept his fleet intact in the face of a potentially overwhelming opponent then was willing to acknowledge that his fleet needed to improve massively before it could take on the Japanese Dr John Rickard author and webmaster of the Military History Encyclopedia on the Web

1930 were fraught and the agreement proved controversial Warships After London examines warship developments in the five major navies during the period 1930-1936 Long term plans were disrupted and new construction had to be reviewed in the light of the new treaty regulations This led to new often smaller designs and a need to balance unit size against overall numbers within each of the categories As ships produced under these restrictions were the newest available when war broke out in 1939 this book is a major contribution to understanding the nature of the navies involved Its value is enhanced by well chosen photographs and by the author's original line drawings showing the ships overall layout armament protection and propulsion

The War for the Seas Evan Mawdsley, 2019-09-24 A bold and authoritative maritime history of World War II which takes a fully international perspective and challenges our existing understanding Command of the oceans was crucial to winning World War II By the start of 1942 Nazi Germany had conquered mainland Europe and Imperial Japan had overrun Southeast Asia and much of the Pacific How could Britain and distant America prevail in what had become a war of continents In this definitive account Evan Mawdsley traces events at sea from the first U boat operations in 1939 to the surrender of Japan He argues that the Allied counterattack involved not just decisive sea battles but a long struggle to control shipping arteries and move armies across the sea Covering all the major actions in the Atlantic and Pacific oceans as well as those in the narrow seas this book interweaves for the first time the endeavors of the maritime forces of the British Empire the United States Germany and Japan as well as those of France Italy and Russia

[Hitler's Island War](#) Julie Peakman, 2017-12-05 Highly Commended by the British Records Association for the 2019 Janette Harley Prize In September 1943 at the height of World War II the Aegean island of Leros became the site of the most pivotal battle of the Dodecanese campaign as the British tried in vain to retain control of the island Over the course of two short months from 15 September 1943 to 17 November 1943 almost 1500 men lost their lives and hundreds more ended up in Prisoner of War camps In this book Julie Peakman a modern day resident of Leros brings to life the story of the men caught up in the battle based on first hand interviews and written accounts including diaries letters and journals She tells of the preparations of the soldiers leading up to the battle the desperate hand to hand fighting and the suffering endured from continual bombings She also shows the extent of the men's despair at the allied surrender the many subsequent daring escapes as well as the terrible years of incarceration for those who were captured and imprisoned Many of the heart rending accounts of the battle are told here for the first time providing a unique eyewitness take on this forgotten corner of World War II
