Federal Communications Commission, 2004 *Computer Vision - ECCV*

2004 Tomas Pajdla, Jiri Matas, 2004-05-10 Welcome to the proceedings of the 8th European Conference on Computer Vision. Following a very successful ECCV 2002 the response to our call for papers was almost equally strong 555 papers were submitted. We accepted 41 papers for oral and 149 papers for poster presentation. Several innovations were introduced into the review process. First the number of program committee members was increased to reduce their review load. We managed to assign to program committee members no more than 12 papers. Second we adopted a paper ranking system. Program committee members were asked to rank all the papers assigned to them even those that were reviewed by additional reviewers. Third we allowed authors to respond to the reviews consolidated in a discussion involving the area chair and the reviewers. Fourth the reports, the reviews and the responses were made available to the authors as well as to the program committee members. Our aim was to provide the authors with maximal feedback and to let the program committee members know how authors reacted to their reviews and how their reviews were or were not reflected in the final decision. Finally we reduced the length of reviewed papers from 15 to 12 pages. The preparation of ECCV 2004 went smoothly thanks to the efforts of the organizing committee, the area chairs, the program committee and the reviewers. We are indebted to Anders Heyden, Mads Nielsen and Henrik J Nielsen for passing on ECCV traditions and to Dominique Asselineau from ENST TSI who kindly provided his GestRFIA conference software. We thank Jan Olof Eklundh and Andrew Zisserman for encouraging us to organize ECCV 2004 in Prague.

Sport and Video

Games Łukasz Muniowski, 2025-02-26 This book explores the complex relationships between sport and video games, two of the largest entertainment sectors globally. Focusing on those games that depict real life sports and athletic competitions from FIFA Madden and NBA 2K to Football Manager and Tony Hawk's Pro Skater, the book examines how sport has influenced gaming and vice versa and how this relationship is likely to develop in the future. Arguing that sports games are a unique interface between virtual worlds and our real life social worlds, the book examines the concept of simulation, how the performance of athletes and teams in the real world influences video games and whether those close links enhance or limit the player's experience. It also considers how video games are used by leagues and sports franchises through sponsorship and in game advertisements to reinforce their brands. Furthermore, it presents a concise history of sports video games and using narrative methods, it takes a close look at the importance of storytelling in sports video games, not only in the sense of the stories built into the structure of a game but also in the way that fans and media organizations build their own stories in sport in both real and virtual worlds. The book also asks how sports video games illuminate our understanding of key social issues including race and gender. This is fascinating reading for anybody with an interest in the sociology or culture of sport or video games, sport business or the gaming industry.
