Academic Capitalism Richard Münch, 2014-04-16 This book investigates the intensifying struggle for excellence between universities in a globalized academic field The rise of the entrepreneurial university and academic capitalism are superimposing themselves on the competition of scientists for progress of knowledge and recognition by the scientific community The result is a sharpening institutional stratification of the field This stratification is produced and continuously reproduced by the intensified struggle for funds with the shrinking of block grants and the growing significance of competitive funding as well as the increasing impact of international and national rankings on academic research and teaching The increased allocation of funds on the basis of performance leads to overinvestment of resources at the small top and underinvestment for the broad mass of universities in the middle and lower ranks There is a curvilinear inverted u shaped relationship of investments and returns in terms of knowledge production Paradoxically the intrusion of the economic logic and measures of managerial controlling into the academic field imply increasing inefficiency in the allocation of resources to universities The top institutions suffer from overinvestment the rank and file institutions from underinvestment The economic inefficiency is accompanied by a shrinking potential for renewal and open knowledge evolution *The Early Admissions Game* Christopher Avery, Andrew Fairbanks, Richard Zeckhauser, 2009-07-01 Based on the careful examination of

more than 500 000 applications to fourteen elite colleges and hundreds of interviews with students counselors and admissions officers this book details the advantages and pitfalls of applying early as it provides a map for students and parents to navigate the process

Empires of Ideas William C. Kirby, 2025-05 A Marginal Revolution Best Non fiction Book

A fascinating book Steven Mintz Inside Higher Ed Substantive on virtually every page the author actually understands how universities work An impressive performance Tyler Cowen Marginal Revolution With his extraordinary breadth of curiosity and equal ease in the histories and cultures of these countries only Bill Kirby could have written this book It is must reading for everyone who cares about universities a thought provoking lesson in the strange mix of durability and vulnerability that defines this key modern institution Richard Broadhead President Emeritus Duke University William Kirby s new book is unique I know of nothing else on higher education that resembles it in breadth scope and sheer comparative information and analysis Anyone interested in the nature of universities during the past two centuries will want to read this volume Neil L Rudenstine President Emeritus Harvard University Today American institutions dominate nearly every major ranking of global universities Yet in historical terms America s preeminence is relatively new and there is no reason to assume that US schools will continue to lead the world a century from now Indeed America s supremacy in higher education is under great stress particularly at its public universities while Chinese universities are on the ascent Will China threaten American primacy Empires of Ideas looks to the past two hundred years for answers examining the successes of leading universities to determine how they rose to prominence and what threats they currently face William C Kirby gives special attention to the challenges that Chinese academic leaders must confront reinvesting in undergraduate teaching developing new models of funding and navigating a political system that may undermine a true commitment to free inquiry and academic excellence

the literature on different theories concerning the global transformation of higher education and presents basic information on higher education in Taiwan. The author develops a four dimensional framework for the analysis of the ranking phenomenon in the island state. First the technological ecological dimension aims to look into how the rankings have impacted Taiwan's higher education based on empirical findings from five Taiwanese public universities. Next the technological geographical dimension examines how Taiwan can use rankings to promote its interests in global higher education. The two conceptual dimensions focus on the relationship between the rankings and power in higher education. They show how the phenomenon can be read and explained through theoretical lenses from ecological and geographical perspectives. From an ecological perspective the empirical evidence suggests that the influence of rankings varies throughout the academic hierarchy in Taiwan. The theoretical analysis then illustrates the relationship between the ranking phenomenon and the power structure in academic hierarchy. Geographically while the empirical analysis is based on data from Taiwan the theoretical analysis offers essential insights that help readers to understand the changing global landscape of higher education and its implications in East Asia.

EASYUNI Ultimate University Guide 2014 easyuni Sdn Bhd, 2014-10-31

Talk does not cook rice. That's a Chinese saying and it's so true. You can talk all you want about your plans but they end right there if you're unable to take steps to accomplish them. With this year coming to an end it's time you gather the courage to accept where you currently stand. Have you applied for the scholarship that could take some burden off your nances? Have you sat for the exam that could open the door to the career of your dreams? Have you attended the seminar that could guide you to your courses? Have you met with the course counselor who could advise on your future career? It's all about planning and working hard to make those plans a reality. Nothing reveals your character more than your determination to succeed. To help get things on the right track is what the easyuni.com Ultimate University Guide is all about. We keep our readers at the core of our focus. Like every issue we have some very instructive articles to guide you in making informed decisions about your future career. Like the magazine you're now holding with a fresh and clean design our website has been redesigned to make it more intuitive and user friendly. For instance now you not only get to see universities based on your subjects and study level but also filter your search results based on rankings, tuition fees and many more preferences. For example if you're looking for a university with a low fee you can just set your budget preference using our slider and find the universities which fall under your budget range. Similarly if a student is looking for top universities just sort the search results by rankings. It's that easy. Till we meet again next year I leave you with a gem from the father of invention himself Thomas Alva Edison. Genius is 1 percent inspiration 99 percent perspiration. It's time for you to shine.
