Store Cards Market Investigation Great Britain: Competition Commission, 2006-04-21 In light of the concerns that have been raised about the lack of transparency of credit card charges in the UK particularly in relation to interest rates charged for store card credit this matter was referred by the Office of Fair Trading to the Competition Commission in March 2004 The Commission's inquiry focuses on two key aspects store card credit services to retailers and related insurance services and consumer credit through store cards and related insurance services These cards offer a method of payment and credit option which are retailer specific and are mostly operated by department stores and clothing retailers The investigation is based on data relating to the period from 1999 to 2003 supplemented by relevant information for 2004 and projections for 2005 and 2006 and focuses on the functioning of the market as a whole rather than on the conduct of individual companies Issues examined include relevant economic markets and the wider regulatory framework proposals to reform the legislation governing the credit market and statutory issues factors that prevent restrict or distort competition detrimental effects on customers and options for remedial action The report finds that the interest rates charged on store cards are too high generally annual percentage rates APRs of between

10 to 20 per cent above required levels resulting in an estimated cost for consumers of at least 55 million a year and possibly significantly more A number of remedies are identified that store card credit providers should make including warning cardholders on monthly statements that cheaper credit may be available elsewhere providing more and clearer information on all monthly statements offering an option to pay by direct debit and offering payment protection insurance separately from other elements of store card insurance

Consumer Lending in France and America Gunnar Trumbull, 2014-08-11 At the beginning of the 20th century consumer credit in the United States was perceived as unfair and exploitative Social reformers fought to limit the economic and social impact of small lenders they decried as loan sharks Reputable businesses steered clear of sales credit because of the questionable consumers that it would attract By the 1970s however credit in America had been

reimagined as a legitimate tool of household finance that was understood to have broad social and economic benefits This transformation in the moral economy of credit accompanied a revolution in lending technologies and the regulatory treatment of consumer credit Ultimately these changes allowed American households to amass unprecedented debt that eventually precipitated the worst financial crisis of postwar America To understand the origins of that crisis we need to understand not just the shifting habits of consumers but also what happened to lenders as the public moved from opposing credit to embracing it This book traces how that transformation occurred Nearly all accounts of the origins of American consumer credit have focused exclusively on the U S experience Single country case studies have their virtues But they do not allow the observer easily to differentiate what is unusual about the U S case from what is common even to countries with very different credit practices

Virtual Competition Ariel Ezrachi, Maurice E. Stucke, 2016-11-14 A fascinating book about how platform internet companies Amazon Facebook and so on are changing the norms of economic competition Fast Company Shoppers with a bargain hunting impulse and internet access can find a universe of products at their fingertips But is there a dark side to internet commerce This thought provoking expos invites us to explore how sophisticated algorithms and data crunching are changing the nature of market competition and not always for the better Introducing into the policy lexicon terms such as algorithmic collusion behavioral discrimination and super platforms Ariel Ezrachi and Maurice E Stucke explore the resulting impact on competition our democratic ideals our wallets and our well being We owe the authors our deep gratitude for anticipating and explaining the consequences of living in a world in which black boxes collude and leave no trails behind They make it clear that in a world of big data and algorithmic pricing consumers are outgunned and antitrust laws are outdated especially in the United States Science A convincing argument that there can be a darker side to the growth of digital commerce The replacement of the invisible hand of competition by the digitized hand of internet commerce can give rise to anticompetitive behavior that the competition authorities are ill equipped to deal with Burton G Malkiel Wall Street Journal A convincing case for the need to rethink competition law to cope with algorithmic capitalism s potential for malfeasance John Naughton The Observer
