guide for anyone looking to navigate the complexities of data privacy in today's digital world A Conceptual Policy Framework for Leveraging Digitalization to Support Diversification in Sub-Saharan Africa Mame Astou Diouf, Leonardo Pio Perez, Felix F. Simione, Arina Viseth, Jiaxiong Yao, 2024-06-21 The need for Sub-Saharan African SSA countries to diversify their economies is more urgent than ever. However, despite its established economic benefits, several challenges have precluded diversification in SSA. Against this backdrop, interesting initiatives to further adopt digital technologies, particularly during the COVID-19 pandemic, suggest that digitalization is a promising avenue to overcome barriers to diversification. Fast-paced advances in the diffusion of digital technologies and knowledge have the potential to transform SSA economies through several channels. By connecting people and facilitating the rapid diffusion of information, digitalization also promises to reshape the industrial structure of activities in new and unprecedented ways. Therefore, digitalization has the potential to promote diversification and growth in SSA by acting both as an enabler and driver of economic activities, helping support resilience. Yet, while the empirical literature on SSA suggests that digitalization can provide new opportunities for growth, employment, productivity, and inclusion, the impact on diversification has not been studied. This paper aims to fill this important gap in the literature. It also aims to strengthen IMF engagement with SSA policy makers by providing a conceptual policy framework encompassing both horizontal and sectoral policies on how to leverage digitalization to support diversification and boost resilience in a post-COVID world **Corporate Law and Climate Change** Andrew

Clarke, 2024-08-26 This book provides an analysis of the impact of the climate crisis on corporate law and theory in the coming decades as the world seeks to meet the target of net zero carbon emissions by 2050. Net zero targets are a particular challenge for an economy such as Australia, which has a historical reliance on fossil fuels and powerful interests arguing for the continued use of coal and gas. The book examines four recent corporate case studies in Australia. The first two follow the Adani group of companies and coal in Queensland and Rio Tinto and the destruction of ancient rock shelters in the midst of iron ore mining in WA. The book then covers the pension fund member Mark McVeigh issuing proceedings against REST super in relation to long-run investment decisions and the need to take into account climate risk. Finally, it discusses Sharma a representative action taken by school children against the Federal government in relation to expansion plans in relation to fossil fuels, alleging breach of the duty of care. These case studies highlight some of the key trends and challenges in the intersection between corporate activity and the need to account for climate risk and adaptation with Australia as a G20 economy having much to contribute to the global debate. The book will be of interest to students and researchers in the field of climate and environmental law as well as corporate law and theory Accounting Information Systems: Connecting Careers, Systems, and Analytics, 1st Australia and New Zealand Edition Arline A.
