Online instruction is rapidly expanding the way administrators and educators think about and plan instruction. In addition, due to a pandemic, online instructional practices and learning in a virtual environment are being implemented with very little training or support. Educators are learning new tools and strategies at a quick pace and often on their own, even through resistance. It is important to explore lessons learned through the pandemic, but also of importance is sharing the virtual classroom options and instruction that align to best practices when transitioning to online instruction. Sharing these will allow educators to understand and learn that virtual instruction can benefit all, even when not used out of need, and can enhance face-to-face courses in many ways. *The Handbook of Research on Lessons Learned From Transitioning to Virtual Classrooms During a Pandemic* is a critical reference that presents lessons instructors have learned throughout the COVID-19 pandemic, including what programs and tools were found to be the most impactful and useful, and how to effectively embed virtual teaching into face-to-face teaching. With difficult choices to be made and implemented, this topic and collection of writings demonstrates the learning curve in a state of survival, and also lessons and resources learned that will be useful when moving back to face-to-face instruction as a tool to continue to use. Highlighted topics include the frustrations faced during the transition, lessons learned from a variety of viewpoints, resources found and used to support instruction online, learner perspectives and thoughts, online course content, and best practices in transitioning to online instruction. This book is ideal for teachers, principals, school leaders, instructional designers, curriculum developers, higher education professors, pre-service teachers, in-service teachers, practitioners, researchers, and anyone interested in developing more effective virtual and in-classroom teaching methods. *Weekly World News*, 1988-07-19. This collection investigates the social and cultural history of trauma to offer a comparative analysis of its individual, communal, and political effects in the twentieth century. Particular attention is given to witness testimony, procedures of personal memory and collective commemoration, and to visual sources as they illuminate the changing historical nature of trauma. The essays draw on diverse methodologies, including oral history, and use varied sources such as literature, film, and the broadcast media. The contributions discuss imaginative communal and political responses, as well as the ways in which the later welfare of traumatized individuals is shaped by medical, military, and civilian institutions. Incorporating innovative methodologies and offering a thorough evaluation of current research, the book shows new directions in historical trauma studies. *Friends' Weekly Intelligencer*, 1887. *100 Ideas for Secondary Teachers: Supporting Students with Autism* by Claire Bullock, 2016-11-17.
