Think Big! Rosemary Ludt, 2020-07-01. *Think Big: A Resource Manual for Library Programs That Attract Large Teen Audiences* is a how-to manual for librarians who want to attract large groups of teens to their libraries with meaningful, memorable events. Large programs may seem to be impossible to attempt until the project is broken down into the separate parts needed. *Think Big* begins with those separate parts necessary to create a large event, starting with the logistics of time and place, the budget and how to find funding, making a timeline to make everything fall into place, communication among all of the people involved, marketing to the teen audience, troubleshooting with thorough preparation and the importance of evaluations for reporting and for future planning. Part 2 is a collection of best practices. Seventeen successful large programs are included, contributed by librarians who have dared to think big and made it work. Included are the book and author programs in school and public libraries. There are also creative programs about poetry and dance, STEM activities, pop culture and school and work. Every section has two to four programs. Each program explains how the program began and evolved to the event it is today, a timeline, how the program was financed, who assisted to make every step successful, how the program was publicized and how evaluations were collected and written are provided in detail to empower a librarian to tackle their first-time big program.

Systems Analysis and Design Alan Dennis, Barbara Haley Wixom, Roberta M. Roth, 2008-12-10. The 4th edition of *Systems Analysis and Design* continues to offer a hands-on approach to SA/D while focusing on the core set of skills that all analysts must possess. Building on their experience as professional systems analysts and award-winning teachers, authors Dennis Wixom and Roth capture the experience of developing and analyzing systems in a way that students can understand and apply. With *Systems Analysis and Design*, 4th edition, students will leave the course with experience that is a rich foundation for further work as a systems analyst.
