

SET UP SMART HOME DEVICES

The next step to building a smart home is to set up the devices and make them respond to your commands. But that doesn't mean all smart home devices need to be configured before use.

For those on a tight budget, or just looking to try out a smart home, choose the devices with the most use cases. For example, you can start with smart lights & cameras.

Next, you need to name each device so that the virtual assistant can identify and help you know which device is in which room (when there are many devices in the house).
