Randomised Controlled Trials Robert Savage, Amy Fox, Aneka Dawson, Helen Gray, Clare Huxley, 2025-03-03 In early 2021/22 the Flexible Phonics reading intervention a large scale randomised controlled trial took place in 118 schools in England and involved nearly 3 000 children This study aimed to provide valuable insights into the success of largely school based education trials The Flexible Phonics trial proved to be not only an important experiment in improving children's literacy but a case study in which the methodology of single randomised controlled trials in education can be considered Reading Randomised Controlled Trials investigates the complexities of conducting randomised controlled trials in the field of education and how they can be seen as a cultural activity The book emphasises the human operations decision making and actions that drive such trials which are often overlooked in published reports Through the case study of Flexible Phonics the book highlights the key differences between scaled educational trials and other types of trials such as pharmaceutical trials The additional focus on early childhood literacy is of significant educational importance particularly in the context of UK school partial closures in 2020 and 2021 during the Covid 19 pandemic Reading Randomised Controlled Trials is ultimately a unique resource on the implementation of randomised controlled trials in authentic school contexts and for the sustained improvement of practice in education

Learning to be Literate Margaret M Clark, 2016-03-10 Winner of the prestigious UK Literacy Association Academic Book Award for 2015 in its original edition this fully revised edition of Learning to be Literate uniquely analyses research into literacy from the 1960s through to 2015 with some surprising conclusions Margaret Clark explores the argument that young children growing up in a literate environment are forming hypotheses about the print around them including environmental print television computer games and mobile phones In a class where no child can yet read there is a wide range of understanding with regards to concepts of print and the critical features of written language While to any literate adult the relationship between spoken and written language may be obvious young children have to be helped to discover it This persuasive argument demonstrates the value of research in order to make informed policy decisions about children's literacy development Accessible and succinct Professor Clark's writing brings into sharp focus the

processes involved in becoming literate The effect on practice of many recent government policies she claims run counter to these insights The key five thematic sections are backed up with case studies throughout and include Insights from Literacy Research 1960s to 1980s Young Literacy Learners how we can help them Curriculum Developments and Literacy Policies 1988 to 1997 a comparison between England and Scotland Synthetic Phonics and Literacy Learning government policy in England 2006 to 2015 Interpretations of Literacy in the Twenty first Century **Bookmarking** Alicia E.
