Revolutionizing Business Operations Tony Saldanha, Filippo Passerini, 2023-09-12 Don't risk the dire consequences of your work processes becoming obsolete. Discover a powerful model for constant, ongoing, enterprise-wide process evolution and optimization. If you have a great product but don't have the operations in place to efficiently and effectively support it, production, manufacturing, sales, finance, human resources, etc., you won't succeed. Product innovation is seen as flashier and so gets far more attention, but you can create an enduring competitive advantage by revolutionizing business operations. The problem is, most attempts to improve business operations are reactive, sporadic, and siloed. Tony Saldanha and Filippo Passerini's Dynamic Process Transformation model provides a

living model for constant ongoing process evolution and optimization The authors focus on maximizing three drivers of change First open market rules each business process must be run as a separate business instead of via monolithic mandates coming down from on high Second there must be unified accountability outcomes must be clear and consistent across the company instead of being siloed within departments And third there needs to be a dynamic operating engine a methodology to convert the constantly changing business process goals into tactical day to day employee actions With numerous examples from leading companies this book shows how to proactively keep business processes across the company from becoming obsolete and take advantage of a neglected key to success Business Innovation Vijay Pandiarajan,2022-01-25 This book provides an understanding of innovation models and why they are important in the business context and considers sources of innovation and how to apply business frameworks using real world examples of innovation led businesses After providing a solid background to the key concepts related to innovation models the book looks at why innovation takes place and where the sources of innovation lie from corporate research to crowd sourced and government funded initiatives Innovation models across manufacturing services and government are explored as well as measuring innovation and the impact of design thinking and lean enterprise principles on innovation and sustainability driven imperatives Offering a truly comprehensive and global approach Business Innovation should be core or recommended reading for advanced undergraduate postgraduate MBA and Executive Education students studying Innovation Management Strategic Management and Entrepreneurship
