

Search Labs | AI Overview

Search engine optimization (SEO) is a process that aims to improve a website's position in search engine results pages (SERPs) and attract traffic from organic search results. The goal is to get more people to see the website because higher rankings result in more organic traffic.

Learn more

WHAT IS SEO:**SEO IS:**

the process of optimizing a website to rank higher in search engine results pages (SERPs) and attract more organic traffic.

SEO IS NOT:

paying for ads or manipulating search engines to rank a website higher.

Backlinko

What is SEO? Search Engine Optimization In Plain English

Aug 1, 2024 — Search engine optimization (SEO) is the practice of get-...

Here are some SEO strategies:**Keyword optimization**

Make a page's content more relevant to a search query. This can include using keywords in the page title, URL, meta description, H1 text, and content.

**Meta descriptions**

Write a short, relevant summary of the page's content that interests and informs users. This is one of the first things people see when searching for something, so it's important to optimize it to convince users to click on the result.

**Link building**

Get other websites to link to your website to build a network of links and strengthen its authority in search engines.

**Crawling and indexing**

Crawling is when Googlebot analyzes the content and code on a page, while indexing is when the page is stored, analyzed, and organized so it can appear in search results.
