Human-Centered AI Ben Shneiderman, 2022-01-13 The remarkable progress in algorithms for machine and deep learning have opened the doors to new opportunities and some dark possibilities However a bright future awaits those who build on their working methods by including HCAI strategies of design and testing As many technology companies and thought leaders have argued the goal is not to replace people but to empower them by making design choices that give humans control over technology In Human

Centered AI Professor Ben Shneiderman offers an optimistic realist's guide to how artificial intelligence can be used to augment and enhance human lives. This project bridges the gap between ethical considerations and practical realities to offer a road map for successful reliable systems. Digital cameras, communications services and navigation apps are just the beginning. Shneiderman shows how future applications will support health and wellness, improve education, accelerate business and connect people in reliable, safe and trustworthy ways that respect human values, rights, justice and dignity.

Artificial Intelligence Charles Jennings, 2019-05-08
Self-learning machines called AIs are popping up all around us. They're real and really important. They're affecting our lives as workers, consumers, investors, citizens, patients and students. AIs bring huge promise but also existential risk. The biggest risk isn't killer robots; it's the renegade leaders, despots and unrestrained hackers everywhere we should worry about. Charles Jennings' insightful new book *Artificial Intelligence: The Rise of the Lightspeed Learners* presents sides of AI most people have never even considered before. That surprises are a main product of AIs. That AI cybersecurity is much more critical than traditional IT security. That as Vladimir Putin put it, the country that leads in AI will control the world. Jennings blends insights into Silicon Valley, Washington D.C. and Beijing with insider AI stories, irreverent humor and strong opinions. He explores the global AI ecosystem from Cambridge to Beijing and provides a stark assessment of AI activity in China where he lived for two years working with senior government officials. He claims that the U.S. and China are in an AI horserace that will be the most important technology contest ever with the outcome still very much in doubt. Consisting of stories, musings, interviews and more, it provides a timely and accessible explanation of AI and its key issues to the general reading public.

Unternehmensverantwortung im digitalen Wandel Bertelsmann Stiftung, Wittenberg-Zentrum für Globale Ethik, 2020-10-12. Die Digitalisierung verändert unsere Wirtschaft und die Gesellschaft grundlegend. Unternehmen sind hierbei zentrale Akteure. Sie treiben die digitale Transformation voran und sind zugleich selbst getrieben, sich dem digitalen Wandel mit neuen Geschäftsmodellen anzupassen. Welche Verantwortung leitet sich daraus ab? Müssen wir unser bisheriges Verständnis einer Corporate Social Responsibility um die Dimension einer Corporate Digital Responsibility erweitern? Welche gesellschaftlich geteilten Werte und Bezeugungen sollen darin zum Ausdruck kommen? Wir haben 83 Autor:innen eingeladen, ihre Ideen sowie ihre praktischen und theoriegeleiteten Sichtweisen zur digitalen Unternehmensverantwortung zu teilen. Damit wollen wir den Stand der Debatte um Corporate Digital Responsibility mit seinen unterschiedlichen und vielfältigen Facetten erfassen und in Unternehmen, Gesellschaft und Politik einbringen.

Militarizing Artificial Intelligence Nik Hynek, Anzhelika Solovyeva, 2022-07-01. This book examines the military characteristics and potential of Artificial Intelligence.

AI in the new global revolution in military affairs Offering an original perspective on the utilization imagination and politics of AI in the context of military development and weapons regulation the work provides a comprehensive response to the question of how we might reflect on the AI revolution in warfare and what can be said about the ways in which this has been handled In the first part of the book AI is accommodated both theoretically and empirically in the strategic context of the Revolution in Military Affairs RMA The book offers a novel understanding of autonomous weapons as multi layered composite systems pointing to a complex non linear interplay between evolutionary and revolutionary dynamics In the second section the book provides an impartial analysis of the related politics and operations of power whereby increases in military budgets and R D of the great powers are met and countered by advocacy networks and scientists campaigning for a ban on lethal autonomous weapons As such it moves beyond popular caricatures of killer robots and points out some of the problems which result from over reliance on such imagery This book will be of much interest to students of strategic studies critical security studies arms control and disarmament science and technology studies and general International Relations
