Apple Music Prices:

Price Management Hermann Simon, Martin Fassnacht, 2018-12-11 In this book the world's foremost experts on pricing integrate theoretical rigor and practical application to present a comprehensive resource that covers all areas of the field. This volume brings together quantitative and qualitative approaches and highlights the most current innovations in theory and practice. Going beyond the traditional constraints of price theory and price policy, the authors coined the term price management to represent a holistic approach to pricing strategy and tactical implementation. They remind us that the Ancient Romans used one word, *pretium*, to mean both price and value. This is the fundamental philosophy that drives successful price management where producer and customer meet. Featuring dozens of examples and case studies drawn from their extensive research consulting and teaching around the world, Simon and Fassnacht cover all aspects of pricing following the price management process with its four phases: strategy analysis, decision, and implementation. Thereby, the authors take into account the nuances across industry sectors including consumer goods, industrial products, services, and trade distribution. In particular, they address the implications of technological advancements such as the Internet and new measurement and sensor technologies that have led to a wealth of price management innovations such as flat rates, freemium, pay per use, or pay what you want. They also address the emergence of new price metrics: Big Data applications, two-sided price systems, negative prices, and the sharing economy, as well as emerging payment systems such as bitcoin. The result is a bible for leaders who recognize that price is not only a means to drive profit in the short term but a tool to generate sustained growth in shareholder value over the longer term and a primer for researchers, instructors, and students alike.

This very important book builds an outstanding bridge between science and practice. Kasper Rorsted, CEO Adidas. Dr. Chang Gyu Hwang, Chairman and CEO KT Corporation, Korea Telecom.

Making Great Strategy Glenn R. Carroll, Jesper B. Sørensen, 2021-01-26 Making strategy requires undertaking major, often irreversible decisions aimed at long-term success in an uncertain future. All leaders must formulate a clear course of action, yet many lack confidence in their ability to think systematically about their strategy. They struggle to apply the abstract lessons offered by conventional approaches to strategic analysis to their unique contexts. *Making Great Strategy* resolves these challenges with a straightforward, readily applicable framework. Jesper B. Sørensen and Glenn R. Carroll show that one factor underlies all sustainably successful strategies: a logically coherent argument that connects resources, capabilities, and environmental conditions to desired outcomes. They introduce a system for formulating and managing strategy through a set of three core activities: visualization, formalization, and logic and constructive argumentation. These activities can be implemented in any organization and are
