from buying a car to choosing a romantic partner our choices are driven by deep seated evolutionary goals Because each of us has multiple evolutionary goals though new research reveals something radical there s more than one you making decisions Although it feels as if there is just one single self inside your head your mind actually contains several different subselves each one steering you in a different direction when it takes its turn at the controls The Rational Animal will transform the way you think about decision making And along the way you ll discover the intimate connections between ovulating strippers Wall Street financiers testosterone crazed skateboarders Steve Jobs Elvis Presley and you
