Rebuild

Mary Portas, 2021-07-01 As seen on THE ONE SHOW and heard on WOMAN'S HOUR and THE ZOE BALL BREAKFAST SHOW on Radio 2. Challenges all the things we thought we knew about business. Sam Baker: "How we live, buy and sell is changing and it's changing for good. Rebuild is a vital guide to how we reset post-pandemic and build back better. Retail and brand expert Mary Portas argues that over the past thirty years the business of what we buy has been dominated by the biggest, fastest and cheapest. But those values no longer resonate. We've come to realize that more doesn't equal better. We are all ready to put people and planet before profit. This Kindness Economy is a new value system where, in order to thrive, businesses must understand the fundamental role they play in the fabric of our lives. Because we don't just want to buy from brands, we want to buy into them. Full of expert insight and invaluable advice, Rebuild is about resetting the dial. It gives businesspeople pause for thought about how to make money as well as the practical tools to build back post-pandemic. And it speaks to anyone who votes with the pound in their pocket, all of us who, with social progress in mind, want to spend our money differently and better."

Doesn't lecture or scold but brings people with her on a journey to a better place. Irish Times: Mary Portas is a woman on a mission. Forbes: **Cross Stitcher Magazine Issue 377 - 2021** Magazines Global,

Chapter 3: Digital Publication Types and Their Markets Pariah S.

Burke,2015-03-13 Now that we've examined the characteristics and capabilities of the available digital publication formats it's time to think about the kind of content you want to disseminate digitally. It's all rather subjective but I'll identify the purpose, characteristics and use of different publication types as well as explain which format classes are best suited to each type. In this chapter you will learn about the following publication types: eBook, Fixed Layout

eBook, E-magazine, Newspaper, E-textbook, Digital Comic Book *Powerful Command-Line Applications in Go* Ricardo

Gerardi,2021-12-08 Whether you want to automate tasks, analyze data, parse logs, talk to network services, or address other systems requirements, writing your own command-line tool may be the fastest and perhaps the most fun way to do it. The Go programming language is a great choice for developing tools that are fast, reliable, and cross-platform. Create command-line tools that work with files, connect to services, and even manage external processes, all while using tests and benchmarks to ensure your programs are fast and correct. When you want to develop cross-platform command-line tools that are fast and reliable, use Go, a modern programming language that combines the reliability of compiled languages with the ease of use and flexibility of dynamic-typed languages. Work through practical examples to develop elegant and efficient tools by applying Go's rich standard library, its built-in support for concurrency, and its expressive syntax. Use Go's integrated testing capabilities to automatically test your tools, ensuring they work reliably even across code refactoring. Develop CLI tools that interact with your users by using common input/output patterns, including environment variables and flags. Handle files to read or persist data and manipulate paths consistently in cross-platform scenarios. Control processes and handle signals, and use a benchmark-driven approach and Go's concurrency primitives to create tools that perform well. Use powerful external libraries such as Cobra to create modern and flexible tools that handle subcommands, and develop tools that interact with databases, APIs, and network services. Finally, leverage what you learned by tackling additional challenges at the end of each chapter. What You Need: Go 1.8 or higher, an internet connection to download the example files and additional libraries, and a text editor to write your programs.
